Michelin starred
chef Gordon
Ramsay presents
your new everyday
cookbook,
featuring recipes
that are max 10
minutes to prep
and 10 minutes to
cook. In Ramsay in
10, superstar chef,
Gordon Ramsay,
returns with 100
new and delicious
recipes inspired by
his YouTube series

watched by millions across the globe — you ' ll be challenged to get creative in the kitchen and learn how to cook incredible, flavorsome dishes in just ten minutes. Whether you need something super quick to assemble, like his Microwave Sticky Toffee Pudding, or you ' re looking to impress the whole family, with a tasty One Pan Pumpkin Pasta or some Chicken Souvlaki — these are recipes guaranteed to become instant classics and with each time you cook, you'll get

faster and faster with Gordon's shortcuts to speed up your cooking, reduce your prep times and get the very best from simple, fresh ingredients. 'When I'm shooting Ramsay in 10, I'm genuinely full of excitement and energy because I get to show everyone how to really cook with confidence. It doesn't matter if it takes you 10 minutes, 12 minutes or even 15 minutes, to me, it's about sharing my 25 years ' of knowledge, expertise and hands-on experience, to make everyone feel

like better, happier cooks.' -- Gordon Ramsay This is fine food at its fastest and fast food at its finest.

The International Movie Industry SIU Press

The 2020 edition analyses tourism performance and policy trends across 51 OECD countries and partner economies. It highlights the need for coherent and comprehensive approaches to tourism policy making, and the significance of the tourism economy, with data covering domestic, inbound and outbound tourism, enterprises and employment, and internal tourism consumption. Tourism policy

priorities, reforms and developments are analysed and examples of country practices highlighted. Thematic chapters provide insights on preparing tourism businesses for the digital transformation, and rethinking tourism success to promote more sustainable and inclusive tourism development. Moody's International Manual IntechOpen One of a number of major works written by Jung during his seventies in which he discusses the relationships between psychology, alchemy and religion. The particular focus in this volume is the rise of Christinity and the figure of Christ. Subsidiarity and EU Multilevel

Governance Walter de Gruyter GmbH & Co KG I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions. **Nuclear Fusion** Hachette UK A reference for chemists, toxicologists, laboratory technicians, manufacturers, safety professionals, emergency first

responders, and lawyers, this international directory of 51 major countries, provides more than 7,500 entries of hazardous chemical manufacturers, organizations, government agencies, hotlines, and useful Web sites for software and databases around the world. *The Biosphere* Routledge A foundational work on historical and social studies of quantification What accounts for the prestige of quantitative methods? The usual answer is that quantification is

desirable in socialbusiness, science and investigation as a government, and bureaucracy. result of its social research *Annotated successes in brings a fresh Checklist of science. Trust in perspective to its Indian Marine Numbers role in Molluscs: questions psychology, Cephalopoda, whether such physics, and Bivalvia and success in the medicine. Scaphopoda study of stars, Quantitative rigor Oxford molecules, or is not inherent in University Press cells should be science but "The authors ... an attractive arises from continue the model for political and pursuit of new research on social pressures, knowledge, human societies, and objectivity calculated to and examines derives its bring new fruits why the natural impetus from of health, safety, sciences are cultural contexts. and comfort to highly In a new preface, man and his quantitative in the first place. the author sheds environs. The Theodore Porter current light on the charms, as well argues that a infatuation with hazards, of the better quantitative terms understanding of methods, 'conservation, the attractions of particularly at the preservation, quantification in intersection of and ecology'*

need to be crystallized so that the public and their decision-makers practice this complex art with clearer conception and perception than is apparent in recent bitter confrontations." —From the Foreword to the Fourth Edition by Abel Wolman
What's New in This Edition:
New entries on environmental and occupational toxicology, geoengineering, and lead abatement
Twenty-five significantly

updated entries, including expanded discussion of water supplies and waste water treatment, biomass and renewable energy, and international public health issues
An expanded list of acronyms and abbreviations
Encyclopedia of Environmental Science and Engineering, Sixth Edition is still the most comprehensive, authoritative reference available in the field. This monumental two-

volume encyclopedia now includes entries on topics ranging from acid rain, air pollution, and community health to environmental law, instrumentation, modeling, alternative energy, radioactive waste, and water treatment. The broad coverage includes highly specialized topics as well as those that transcend traditional disciplinary boundaries, reflecting the interdisciplinary

skills and knowledge required by environmental researchers and engineers. Featuring expert contributors representing industry, academia, and government agencies, the encyclopedia presents fundamental concepts and applications in environmental science and engineering. The entries are supported by extensive figures, photographs, tables, and equations. This

sixth edition includes new material on water supplies and wastewater treatment, biomass and renewable energy, and international public health issues. New entries cover environmental and occupational toxicology, geoengineering, and lead abatement. The Encyclopedia of Environmental Science and Engineering provides a view of the field that helps readers understand, manage, and

respond to threats to the human environment. Contact us to inquire about subscription options and print/online combination packages. US: (Tel) 1.888.318.2367 / (email) reference@taylorandfrancis.com International: (Tel) +44 (0) 20 7017 6062 / (email) online.sales@tandf.co.uk *Publications of the National Bureau of Standards, 1966-1967 CRC Press* Historical scholarship is currently

undergoing a digital turn. All historians have experienced this change in one way or another, by writing on word processors, applying quantitative methods on digitalized source materials, or using internet resources and digital tools. Digital Histories showcases this emerging wave of digital history research. It presents work by historians who – on their own or through collaborations with e.g. information technology specialists – have uncovered new, empirical historical knowledge through digital and computational methods. The topics of the volume range

from the medieval period to the present day, including various parts of Europe. The chapters apply an exemplary array of methods, such as digital metadata analysis, machine learning, network analysis, topic modelling, named entity recognition, collocation analysis, critical search, and text and data mining. The volume argues that digital history is entering a mature phase, digital history ‘in action’, where its focus is shifting from the building of resources towards the making of new historical knowledge. This also involves novel challenges that digital methods pose to historical

research, including awareness of the pitfalls and limitations of the digital tools and the necessity of new forms of digital source criticisms. Through its combination of empirical, conceptual and contextual studies, Digital Histories is a timely and pioneering contribution taking stock of how digital research currently advances historical scholarship. *The Story of Evolution* K. G. Saur A comprehensive history of the international movie industry during the 20th century. Essays examine the film industries of 19 countries focusing on

individual national movie industries' economic, social, aesthetic, technological and political/ideological development within an international context.

A Multiplier Table of Astrophysical Interest Springer

This study formulates a conception of knowledge in interactive practice disciplines such as education and health care and clarifies different types of knowledge in these disciplines. Focus is on the relationship between

practical and theoretical knowledge. Four theses are discussed: (1) the role of knowledge in an interactive practice is to guide practice; (2) different types of knowledge in an interactive practice consist of value-knowledge, factual knowledge and procedural knowledge, parts of which are unarticulated, parts articulated; (3) science is a way of articulating and creating

knowledge that can be used as internal action determinants in the practice concerned; and (4) theories in an interactive practice can have both a theoretical and a practical purpose but the theoretical purpose is also indirectly linked to the practical. (Author/JD) Planning in Cold War Europe Routledge Fusion research started over half a century ago. Although the task remains unfinished, the end of the road could be in sight if society makes the right decisions.

Nuclear Fusion: Half a Century of Magnetic Confinement Fusion Research is a careful, scholarly account of the course of fusion energy research over the past fifty years. The authors outline the different paths followed by fusion research from initial ignorance to present understanding. They explore why a particular scheme would not work and why it was more profitable to concentrate on the mainstream tokamak development. The book features descriptive sections, in-depth explanations of certain physical and technical issues,

scientific terms, and an extensive glossary that explains relevant abbreviations and acronyms.

Examining possible connections between prophecy and changes in media in the century after Gutenberg

New Glass CRC Press

This book examines the theory and praxis of the legal concept of subsidiarity and the policy paradigm of multilevel governance,

providing an updated overview on how subnational and national authorities engage within the EU institutional framework. Providing a theoretical assessment of real-life case studies, the book reflects on a number of key events from the negotiations of the European Convention to the process that led to the "Brexit" referendum and assesses the key agendas and institutional ethos of most actors involved in EU policymaking. It particularly

focusses on the EU engagement of so-called non-privileged actors, such as subnational authorities from the UK, Germany, Austria, Italy, the Netherlands and Scandinavia, as well as national and regional parliaments. The author goes on to examine the sometimes selfish behaviour and individual agendas of the European Commission, European Parliament, Member States and even the European Court of Justice but also identifies many constructive ways of interaction that

can decisively frame how EU decisions are made. This comprehensive book will be a useful reference to students, practitioners and academic researchers working in European politics, policymaking, public policy and EU law and integration. Manual of Meteorology ...: Comparative meteorology University of Michigan Press This book addresses several issues related to the introduction of automaton and

robotics in the construction industry in a collection of 23 chapters. The chapters are grouped in 3 main sections according to the theme or the type of technology they treat. Section I is dedicated to describe and analyse the main research challenges of Robotics and Automation in Construction (RAC). The second section consists of 12 chapters and is dedicated to the technologies and new

developments employed to automate processes in the construction industry. Among these we have examples of ICT technologies used for purposes such as construction visualisation systems, added value management systems, construction materials and elements tracking using multiple IDs devices. This section also deals with Sensorial Systems and software used in

the construction to improve the performances of machines such as cranes, and in improving Human-Machine Interfaces (MMI). Authors adopted Mixed and Augmented Reality in the MMI to ease the construction operations. Section III is dedicated to describe case studies of RAC and comprises 8 chapters. Among the eight chapters the section presents a robotic excavator and a semi-automated façade cleaning

system. The section also presents work dedicated to enhancing the force of the workers in construction through the use of Robotic-powered exoskeletons and body joint-adapted assistive units, which allow the handling of greater loads. *Equity and the Law of Trusts* London : Library Association The idea of planning economy and engineering social life has often been

linked with Communist regimes' will of control. However, the persuasion that social and economic processes could and should be regulated was by no means limited to them. Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis. During the Cold War, such discussions fuelled competition between two

models of economic and social organisation but they also revealed the convergences and complementarities between them. This ambiguity, so often overlooked in histories of the Cold War, represents the central issue of the book organized around three axes. First, it highlights how know-how on planning circulated globally and were exchanged by looking at international

platforms and organizations. The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World. Finally, it explores East-West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries. The volume thus contributes to two fields undergoing a process of

profound
reassessment:
the history of
modernisation
and of the Cold
War.

Questions about
the temporality and
historicity of
knowledge have
gained new
urgency in the
human sciences in
recent decades.
New modes of
critical theorizing,
coupled with a
reshaping of the
historical space of
Western culture
following the
unification of
Europe and
intensified political
and technological
globalization, have
highlighted the
necessity of

understanding the
formation of
historical
consciousness from
new angles. The
"uses of history,"
the commodification
of the past, the
pathologies of
memory, the
chronological
framework of
historical narrative,
and the
technological forms
of representing and
maintaining tradition
all now require
cross-disciplinary
interpretation. This
volume gathers a
wide range of
researchers from
philosophy, history,
archeology, and the
aesthetic and social
sciences in a
collaborative effort
to critically explore
historical
consciousness as
time, memory, and
representation.

About the series.
Sodertorn
Philosophical
Studies is a book
series published
under the direction
of the Department
of Philosophy at
Sodertorn
University. The
series consists of
monographs and
anthologies in
philosophy, with a
special focus on the
Continental-
European tradition.
It seeks to provide a
platform for
innovative
contemporary
philosophical
research. The
volumes are
published mainly in
English and
Swedish. The series
is edited by Marcia
Sa Cavalcante
Schuback and Hans
Ruin.

International

Books in Print, 1995 W.H. Freeman
How is language acquired when infants are exposed to multiple language input from birth and when adults are required to learn a second language after early childhood? How do adult bilinguals comprehend and produce words and sentences when their two languages are potentially always active and in competition with one another? What are the

neural mechanisms that underlie proficient bilingualism? What are the general consequences of bilingualism for cognition and for language and thought? This handbook will be essential reading for cognitive psychologists, linguists, applied linguists, and educators who wish to better understand the cognitive basis of bilingualism and the logic of experimental and formal approaches to language

science.
