Using both established as well as more recent modes of inquiry, this book sheds new light on an increasingly important dimension of organizational cooperation and competition - that of knowledge and knowledge transfer. Based on research and practice, the book addresses a wide range of issues concerning the management of knowledge, from knowledge transfer between organizations to knowledge management within organizations. Divided into two parts, *Managing Knowledge* reflects a fundamental conceptual distinction between two world-views. The first part is characterized by representationism, or traditional approaches to viewing knowledge, knowledge transfer and cooperative strategies. The contributors provide a clear overview of the current research on knowledge management, and bring together studies on the sociology of knowledge, strategic management and learning theory. The second part focuses on anti-representationism, or new perspectives on knowledge and knowledge transfer in organizational cooperation. These perspectives, based on autopoiesis theory, go far beyond conventional ways of perceiving and managing knowledge and their implications for management theory and practice are fully examined.

In Battle for Peace frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a powerful analysis of race in America.

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be

experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.
A Little Book on Tea, Cake and Chocolate SAGE

This book examines the gendered politics in the context of a merger of the women's and men's athletic departments at the University of Minnesota over a ten year plus span. Examining the athletic department merger helps us understand women's continual under-representation in University athletics despite Title IX legislation passing 40 years ago. Using interview with organizational stakeholders and archival document data, the book explores how organizational change in the form of a merger is gendered with relation to the premerger, merged, post-merger stages.

Nationalism, nation-building and 'defensive modernisation' were the main themes of the 'cultural revolution' underpinning the totalitarian and secular regimes of Ataturk and Reza Shah which replaced the traditional Qajar state of Iran and the long-declining Ottoman Empire. The authors trace the emergence of Ataturk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire and the introduction of European social models, the establishment of dictatorship and of secularist

reforms resulting in both cases in totalitarian, nationalist, and quasi-westernised states, and the personality cult of the leader. The legacy of both was a chasm between the elite and the masses and provided the seeding of an Islamic mass-movement.

First released in 1969, during a time of great uncertainty for the Philippines, this unauthorized biography of one of the most intriguing women in the world was banned in her own country. For writing it, Carmen Pedrosa, with her family, was exiled to London for 20 years. Despite that, *The Untold Story of Imelda Marcos* became a local and international hit, selling out all of its print runs. Now, decades after the end of Martial Law, the book returns to tell the story of Imelda Romualdez-Marcos to a new generation. A modern Cinderella tale, *The Untold Story of Imelda Marcos* tells of how she rose from being a destitute child to becoming the most powerful woman of the country. Starry-eyed, penniless, and provincial, Imelda was in search of good fortune in Manila. Then came Ferdinand E. Marcos, a knight in shining armor, rescuing her from poverty and misery. "I will make you the First Lady of the land," he promised her. Complete, detailed, and replete with facts and documents that have been painstakingly hidden from the public by the administration's image-makers, her life story unfolds, one truth at a time. It explains Imelda's much vaunted charisma that, in President Marcos' own words, garnered one million votes in the 1965 elections. She is a person who is difficult to be indifferent to. This book tells us why.

This book provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research. The fifth 2020 Future Technologies Conference was organized virtually and received a total of 590 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to computing, electronics, artificial intelligence, robotics, security and communications and their applications to the real world. After a double-blind peer review process, 210 submissions (including 6 poster papers) have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies, but also to promote discussions and debate of relevant issues, challenges, opportunities and research findings. The authors hope that readers find the book interesting, exciting and inspiring.
