This illustrated technical package provides an overview about youth violence and evidence-based strategies for community leaders, families, school administrators, teachers, law enforcement, and state leaders to utilize as methods for youth violence prevention. Some example strategies include: Preschool enrichment with family engagement and parent education Mentoring/After School programs Hospital community partnership programs Youth volunteer opportunities While individual skills are important and research has demonstrated the preventive effects of many youth skill development programs, approaches addressing relationships with parents, peers, and other caring adults as well as approaches that influence school and community environments are equally important to have the greatest public health impact.
