The Obstetric Hematology Manual John Wiley & Sons

This extensively-updated text is designed to promote excellence in pediatric nursing care, in both acute care settings and in the community. CHILD HEALTH NURSING, 3/e focuses on helping students synthesize new knowledge, apply evidence-based findings, collaborate with children, families, and other healthcare professionals, and use clinical reasoning to plan superior care. It views families as integral participants in all care, and recognizes that all children need health promotion and maintenance interventions, wherever they seek care or whatever conditions they are experiencing. This edition uses current NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020 recommendations. Sample nursing care plans help students apply developmental, psychosocial, and physiologic concepts to the care of children with specific conditions. Research, clinical reasoning, and evidence-based practice are emphasized and integrated throughout, and coverage of contemporary topics ranges from genomics to new pharmacological treatment options.

Post-Anesthesia Care Cambridge University Press

The initial hours after surgery are a critical time in the care of the surgical patient. Familiarity with the clinical presentation of perioperative complications is important to achieving optimal outcomes. By taking an approach to complications based upon signs and symptoms seen in the early post-operative period among adult patients undergoing non-cardiac surgery, this book aids the practitioner in the clinical management of surgical patients during the often turbulent hours after surgery. After a brief introduction to PACU organization, this manual discusses the common and most serious symptoms encountered in the post-operative patient, giving guidance on diagnosis of the underlying disorder and the treatment options available. The book also includes chapters dedicated to subspecialty patients, including patients requiring post-operative mechanical ventilation, pediatric patients, patients with implantable cardiac devices, morbidly obese patients and the complex pain patient. This practical manual is essential reading for all practitioners working in the PACU environment.

The Ambulatory Care Nursing Review Questions, 5th edition, published by the American Academy of Ambulatory Care Nursing (AAACN). This set of practice test items is designed to assist ambulatory care nurses in assessing their knowledge of the practice of ambulatory care nursing. Professional nurses should take every opportunity to advance their expertise, skills, and knowledge, and use tools such as this publication to assess their knowledge gaps and learn from studying the answers. All review questions, answers, and their associated page numbers (found in the back of the booklet) are based on the Core Curriculum for Ambulatory Care Nursing, 4th edition (Laughlin & Witwer, 2019), a AAACN publication. Using the Core Curriculum as the companion to this set of review questions is highly recommended. This edition of the Review Questions has been updated to reflect the latest content outline of the Ambulatory Care Nursing Certification Exam of the American Nurses Credentialing Center (ANCC) published in 2017. The 180 multiple-choice items follow the same format as the questions on the ANCC Ambulatory Care Nursing Certification Exam. The multiple-choice items are grouped into five domains of practice corresponding to those on the examination. The content in each of the domains and the percentage of questions are drawn directly from the test content outline as published by ANCC at the time of this writing.
