The ATP III document is an evidence-based report that provides the scientific rationale for the recommendations contained in the Executive Summary. ATP III is constructed on the foundation of ATP I and ATP II, with low density lipoprotein (LDL) continuing to be identified as the primary target of cholesterol lowering therapy.

(24 and 30 g/day, respectively). A similar reduction in LDL cholesterol can be achieved with 1.5 to 4.5 g/day of colesevelam. Bile acid sequestrants are also effective when used in combination with a statin or nicotinic acid in patients with markedly elevated plasma levels of LDL-C . The use of a bile acid sequestrant is often limited by side effects.

Guidelines Update
'ATP-4' -- Finally! ACC
and AHA have been
collaborating for a long
time on guidelines. I
learned that they started
collaborating in 1980
with the first guideline, a
pacemaker guideline
released in 1984. So
they've been at this for a
very long time, almost 30
years.
