A corded phone can draw  
power over the incoming phone  
line, while a cordless handset has  
an internal, rechargeable battery  
that will recharge through the  
base of the phone. One of the  
models tested, the AT&T  
TL86103 , has a corded handset  
on its base, allowing it to operate  
in a telephone line power mode.

5.8 GHz. 5.8 GHz  
phones offer great  
clarity and range.  
The biggest advantage  
to a 5.8 GHz phone is  
that its frequency  
band is less  
congested than the  
2.4 GHz band,  
resulting in less  
interference. 5.8 GHz  
phones are plentiful  
in the marketplace  
today and
