Commodity Credit Corporation Regulation) (CCC) (2018 Edition). Updated as of May 29, 2018 This rule implements the new Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) Programs authorized by the Agricultural Act of 2014 (the 2014 Farm Bill). It also includes conforming changes to certain Farm Service Agency (FSA) regulations that apply to multiple programs. ARC and PLC provide producers a choice between a program that provides counter-cyclical type of payment support-PLC, and a revenue support type of program-ARC. During a defined election period, current producers can elect different programs for different covered commodities on a farm, for example, choosing PLC for corn and ARC county option for soybeans on the same farm. ARC offers the additional choice of a revenue guarantee based on average revenue for a county or on actual historical revenue for an individual farm. If a producer elects ARC individual coverage based on historical revenue for that specific farm, however, all the farm's covered commodities are elected with that option, with no option for PLC on that farm. This rule specifies the eligibility requirements, enrollment procedures, and payment calculations for ARC and PLC. This book contains: - The complete text of the Agriculture Risk Coverage and Price Loss Coverage Programs (US Commodity Credit Corporation Regulation) (CCC) (2018 Edition) - A table of contents with the page number of each section **Hardware Hacker** Scholastic Inc.
