In Ezra's first book, he learned about baseball, girls, cars, drinking, and a lot of hard physical labor, not necessarily in that order. America had not yet been pulled into the war in Europe, and we didn't yet know much about that strange little country across the Pacific, known as Japan. As we pick up the story in book two, Ezra is now in his early 20's, working hard for meager pay, and a long way from his family in Illinois and Indiana. He has been to a handful of states, now he thinks he would like to see the world. He enlists in the military and asks to go to the Philippines. He talks about baseball, girls, cars, and drinking, not necessarily in that order. He gets married on Independence Day, and soon after, his country also goes to war. He was on a troopship heading for the Philippines when news came over the radio about Pearl Harbor. It said, "This is not one of those Orson Wells stories like we had on Halloween a couple years before." It said, "This is the real thing." The ship was ordered back to San Francisco. He eventually does get his wish, to go to the Philippines. Come with Ezra as he becomes the wanderer, the man with Government Issue Gypsy blood. With more than 165 pictures, some in color. **THIS VERSION OF THE BOOK IS BLACK AND WHITE**

Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

This text explores the history and development of the many technologies that have led to how we treat contemporary urologic problems. From the development of the cystoscope, the advances in laparoscopy, the birth of the field of endourology, to the era of robotics today, urologists have pushed the envelope in technologic innovation. The editors highlight the development of the cystoscope and the early tools used to treat ureteral stones, the development of ureteroscopy, and the applications of lasers and shock wave lithotripsy in the treatment of urolithiasis.

Furthermore, they explore the history of minimally invasive treatments in urologic oncology from the story behind the first laparoscopic nephrectomy, the application of hand-assisted technology to the development of robotics and percutaneous treatment approaches (radiofrequency ablation and cryoablation). As the field of urology continues to evolve, urologists will continue to look to the future with the recent applications of histotripsy and regenerative medicine. This text chronicles the creativity, innovation and discovery of the developments of the instruments

that allow to practice urology today, as well as glimpse what the future of urology holds.

"The fifth edition has been thoroughly updated and enhanced throughout. We have developed a completely new chapter on business models, incorporating the Business Model Wheel. Angelo Santinelli, a former venture capitalist, entrepreneur and currently a startup advisor brings his 30 years of new venture experience and wrote the chapter on a new way to consider business models. We replaced half of the older cases. We have added cases on MightyWell, a medical apparel company looking to bring fashion to patients (Chapter 1), Vedaboo (Chapter 2) and iSlide (Chapter 3) which tracks product development in the sporting goods space, Gravyty, (Chapters 8 and 9) which shows a business planning process through the lens of artificial intelligence-based firm, Wefunder (Chapter 12) which looks at legal issues confronting crowdfunding, Espote Interativo (Chapter 13) that illustrates a company striving to continue growth in a competitive industry and Inner City Weightlifting (Chapter 14) that highlights a social venture changing the lives of young men prone to gang activity"--

Richard De Veaux, Paul Velleman, and David Bock wrote Stats: Data and Models with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results.
