This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or

Recent decades have witnessed the rise of social and environmental certification programs that are intended to promote responsible business practices. Consumers now encounter organic or fair-trade labels on a variety of products, implying such desirable benefits as improved environmental conditions or more equitable market transactions. But what do we know about the origins and development of the organizations behind these labels? This book examines forest, coffee, and fishery certification programs to reveal how the early decisions of programs on governance and standards affect the path along which individual programs evolve and the variety and number of programs across sectors.
