The original rally Quattro  
debuted in 1980, and was based  
on the road car, but with a  
highly tuned 300bhp engine. In  
1981, Audi Quattro works  
driver Michele Mouton became  
the first woman to win a World  
Championship rally. The  
Quattro took the  
Manufacturers '   
Championship in 1982 and  
1984, and the Drivers '   
Championship in 1983 and 1984  
with Hannu Mikkola and Stig

Blomqvist respectively. Audi  
implemented a continuous  
development programme for the  
Quattro, and the A1 and A2  
were produced to meet the  
Group B regulations introduced  
in 1983, while the fearsome Sport  
Quattro S1 was introduced in  
1984. The ultimate development  
– the S1 E2 – was introduced  
at the end of 1985, producing  
over 500bhp, and winning the  
1985 San Remo rally in the hands  
of Walter Röhrl and the famous  
Pikes Peak hillclimb with  
Michele Mouton. The Audi  
Quattro Rally Car Manual looks  
at the design, evolution, anatomy  
and operation of the Quattro.

author Rob Siegel takes the fear-factor out of projects like making wire repairs, measuring voltage drops, or figuring out if you have a bad fuel pump relay. Essential tools such as multimeters (DVOM), oscilloscopes, and scan tools are discussed, with special attention given to the automotive multimeter needed to troubleshoot many modern sensors. You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed

sensors, fuel pumps, solenoids, and actuators. Reading wiring diagrams and decoding the German DIN standard are also covered. Whether you are a DIY mechanic or a professional technician, The Hack Mechanic Guide to European Automotive Electrical Systems will increase your confidence in tackling automotive electrical problem-solving. This book applies to gasoline and diesel powered internal combustion engine vehicles. Not intended for hybrid or electric vehicles.
