Canada's top consumer advocate returns with more financial advice. Canadian consumers are focused on spending and managing what money they do have wisely, but have more questions than answers on most financial topics.

Television personality and consumer advocate Pat Foran shares tips and strategies about the questions and issues he sees most often, and explains how some little things can soon add up to a lot of money. Some of the topics covered include: Credit and loyalty cards, and what kind of deal they really are How much insurance is enough – and what kinds do most people need? How to shop

for a vehicle, and if it's worth it to import from the US Mortgages, tax breaks, and other complicated financial decisions Getting the most bang for your buck, whether while shopping or travelling Packed with money-saving advice, this title will also include the latest information on marketplace trends, the investment climate, housing prices, interest rates, and other techniques for savings. As an added bonus, Pat has included quotes and comments from prominent Canadian businesspeople and celebrities about the best financial advice they've received in their lifetimes. Pat Foran is seen by millions of Canadians each week as the Consumer Reporter for CFTO News, and Consumer Expert on CTV's Canada AM. His "Consumer Alert"

segment is currently on CFTO's noon, six o'clock and eleven-thirty newscasts, five days a week with an audience of 700,000 viewers, and he appears on Canada AM, Canada's number-one national morning show every week, dispensing financial and consumer advice.

Polypropylene: The Definitive User's Guide and Databook presents in a single volume a panoramic and up-to-the-minute user's guide for today's most important thermoplastic. The book examines every aspect of science, technology, engineering, properties, design, processing, applications of the continuing development and use of polypropylene. The unique treatment means that specialists can not only find what they want but for the first time can relate to and understand the needs and requirements of others in the product development chain. The

entire work is underpinned by very extensive collections of property data that allow the reader to put the information to real industrial and commercial use. Despite the preeminence and unrivaled versatility of polypropylene as a thermoplastic material to manufacture, relatively few books have been devoted to its study.

Polypropylene: The Definitive User's Guide and Databook not only fills the gap but breaks new ground in doing so.

Polypropylene is the most popular thermoplastic in use today, and still one of the fastest growing. Polypropylene: The Definitive User's Guide and Databook is the complete workbook and reference resource for all those who work with the material. Its comprehensive scope uniquely caters to polymer scientists, plastics engineers, processing technologists, product designers, machinery and mold makers, product managers, end users, researchers and students alike.

The biennial European Conference on Machine Learning (ECML) series is intended to provide an international forum for the discussion of the latest high quality research results in machine learning and is the major European scientific event in the field. The eleventh conference (ECML 2000) held in Barcelona, Catalonia, Spain from May 31 to June 2, 2000, has continued this tradition by attracting high quality papers

from around the world. Scientists from 21 countries submitted 100 papers to ECML 2000, from which 20 were selected for long oral presentations and 23 for short oral presentations. This selection was based on the recommendations of at least two reviewers for each submitted paper. It is worth noticing that the number of papers reporting applications of machine learning has increased in comparison to past ECML conferences. We believe this fact shows the growing maturity of the field. This volume contains the 43 accepted papers as well as the invited talks by Katharina Morik from the University of Dortmund and Pedro Domingos from the University of Washington at Seattle. In addition, three workshops were jointly organized by ECML 2000 and the European Network of Excellence - net: "Dealing with Structured Data

in Machine Learning and Statistics W- stites", "Machine Learning in the New Information Age", and "Meta-Learning: Building Automatic Advice Strategies for Model Selection and Method Com- nation".

Butterworth-Heinemann Building on a wealth of research, The Automotive Industry and the Environment addresses current challenges in the automotive industry and how they can be met. The

authors discuss the development of the automotive industry and the problems it currently faces and consider possible solutions. The book reviews trends in more environmental-friendly technologies, such as the use of more sustainable fuel sources and new types of modular designs with built-in recyclability. The book also describes new models of decentralized production, particularly the micro factory retailing (MFR) model, that provide an alternative to volume production and promise to be both more sustainable and more profitable.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash
