"Fast, tense, thrilling — and timely: this will happen one day. Highly recommended." —Lee Child, #1 New York Times bestselling author of the Jack Reacher series This is no accident. This is no act of God. This is a Blackout. When the lights go out one night, no one panics. Not yet. The lights always come back on soon, don't they? Surely it's a glitch, a storm, a malfunction. But something seems strange about this night. Across Europe, controllers watch in disbelief as electrical

grids collapse. There is no power, anywhere. A former hacker and activist, Piero investigates a possible cause of the disaster. The authorities don't believe him, and he soon becomes a prime suspect himself. With the United States now also at risk, Piero goes on the run with Lauren Shannon, a young American CNN reporter based in Paris, desperate to uncover who is behind the attacks. After all, the power doesn't just keep the lights on—it keeps us alive.

On a small assembly line in Neckarsulm, Germany, no more than twenty exotic Audi R8 sports cars are built daily. The entire process is overseen by small teams of specialists that oversee every step of production. Every single part is inspected carefully, and nothing goes unchecked. It is a level of hand-built quality one might expect to find in a Ferrari Enzo or the Vector W8A of the 1980s, but almost unheard of from a manufacturer the size of Audi AG. The Turbo Quattro Coupe (or Urquattro) of the early 1980s was largely assembled by hand much in the same way, but Audi has refined the process for the R8 and has introduced one of the most spectacular sports cars ever. I hope this book will provide a better insight into the design, development, and production of this magnificent automobile.

“ Refreshingly thought-provoking... ” – The Financial Times
The essential playbook for the future of your business
What To Do When Machines Do Everything is a guidebook to succeeding in the next generation of the digital economy. When systems running on Artificial Intelligence can drive our cars, diagnose medical patients, and manage our finances more effectively than humans it raises profound questions on the future of work and how companies compete. Illustrated with real-world cases, data, and insight, the authors provide clear strategic guidance and actionable steps to help you and your organization move ahead in a world where exponentially developing new technologies are changing how value is created. Written by a team of business and technology expert practitioners—who also authored Code Halos: How the Digital Lives of People, Things, and Organizations are Changing the Rules of Business—this book provides a clear path to the future of your work. The first part of the book examines the once in a generation upheaval most every organization will soon face as systems of intelligence go mainstream. The authors argue that contrary to the doom and gloom that surrounds much of IT and business at the moment, we are in fact on the cusp of the biggest wave of opportunity creation since the Industrial Revolution. Next, the authors detail a clear-cut business model to help leaders take part in this coming boom; the AHEAD model outlines five strategic initiatives—Automate, Halos, Enhance, Abundance, and Discovery—that are central to competing in the next phase of global business by driving new levels of efficiency, customer intimacy and innovation. Business leaders today have two options: be swallowed up by the ongoing technological evolution, or ride the crest of the wave to new

profits and better business. This book shows you how to avoid your own extinction event, and will help you; Understand the untold full extent of technology's impact on the way we work and live. Find out where we're headed, and how soon the future will arrive Leverage the new emerging paradigm into a sustainable business advantage Adopt a strategic model for winning in the new economy The digital world is already transforming how we work, live, and shop, how we are governed and entertained, and how we manage our money, health, security, and relationships. Don't let your business—or your career—get left behind. What To Do When Machines Do Everything is your strategic roadmap to a future full of possibility and success. Or peril.

Only Greg Rucka, the thriller genre 's most fearless writer, would dare create a spy so edgy, so explosive, so extreme, she should be rated X. Tara Chace was once the most dangerous woman alive. And now that the international spy network thinks she 's as good as dead, she 's even more dangerous than ever. Only one thing could coax Tara back into the game: a chance to vindicate herself. The torture and execution of Dina Malikov has set off a cutthroat grab for power in strategically crucial Uzbekistan. Tara 's job is to slip into the country and extract Dina 's pro-Western husband and their young son before they are murdered—by his ruthless sister. But there are a couple of wild cards in the deck, including a missing mobile weapons system that can bring down a commercial airliner, not to mention powerful political careers. Now, as she vanishes into hostile territory with a man who may or may not be what he seems, Tara is going to find out that the war on terror is more terrifying than anyone knows. For in a battle where betrayal is a conventional weapon, loyalty is a weakness, and anyone—even a child—is a legitimate target: it 's every spy, every woman, for herself. Combine a thriller that defies every expectation with a heroine for whom nothing is out of bounds, and the result is Private Wars, a suspense novel so explosively realistic, it should be classified.

The automotive industry appears close to substantial change engendered by “ self-driving ” technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.
