An award-
winning
scientist offers
his unorthodox
approach to
childrearing:
“ Parentology is
brilliant, jaw-
droppingly

funny, and full
of
wisdom...bound
to change your
thinking about
parenting and
its
conventions ”
(Amy Chua,
author of Battle
Hymn of the
Tiger Mother).
If you ' re like
many parents,
you might ask
family and
friends for
advice when
faced with
important
choices about
how to raise
your kids. You
might turn to
parenting
books or
simply rely on
timeworn

religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy.
