In *The Devil I Know*, award-winning writer Claire Kilroy delivers a delicious novel, a cautionary tale of financial excess set during the Irish property bubble. Tristram St. Lawrence has not been home for years—ever since he missed his mother’s deathbed in favor of going on a bender, the thirteenth Earl of Howth is not welcome in the family castle. Now sober, he lives in self-imposed exile, and his main confidant is his sponsor, a mysterious businessman known only as M. Deauville. One day, when

his plane is unexpectedly diverted to Dublin, Tristram ends up where he started, and an old acquaintance, a bully from his school days who’s now making a name in construction, pitches to Tristram an ambitious development project. The trouble is, M. Deauville thinks it’s a good idea, and before Tristram knows it he’s settled in Howth under his father’s baleful gaze and is up to his neck in funding proposals, zoning approvals, and the personal life of his business partner. A wry and

timely skewering of a country, a man, and an entire international financial system descended into madness, *The Devil I Know* establishes Claire Kilroy as a vigorous and wonderful new talent.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold

each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio

frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2007 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies.
