The Wiebo Ludwig affair brought to the forefront the often explosive relationship between the oil and gas industry and the ranchers and farmers who live under the shadow of its rigs. But behind the headlines, an unreported sea-change is taking place in the long history of these very

different players. Canada's petroleum industry is in the middle of a massive Sherwood Anderson, and Clarence Darrow were among its paradigm shift. The old focus of drill fast, pump profits, leave quick is long gone. New executives and directors are bringing a mentality of corporate and social responsibility to the industry that pays attention to a triple bottom line: environmental, social, and economic. A Patch of Green examines the forces that have come to bear to bring about this change. From the viewpoints of environmentalists, landowners, drill workers and corporate executives, veteran journalist Sydney Sharpe reveals an industry wrestling with the excesses of its past and learning to profit from a new economic future.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Poetry. "Matthew Lippman's poems know how to love as only a own! Using this book's straightforward, step-by-stepapproach, you'll heart knows how to love. Swelling with rage, candor, humor, and empathy, his lyrics embrace vulnerability and grit that navigate the mire that the world lays before us each day. Their music makes singular reconciliations where anxiety and angst are lent a tough and tender grace."—Michael Morse "Reading a Matthew Lippman poem is like encountering an unstoppable force—or forces. One moment you're walking down Broadway next to an old friend who's talking a mile a minute—he's on a tear, he's manic but eminently likable, and his monologue is listening to a voiceover spoken by a hardboiled and vaguely hypnagogic private eye. And yet another moment you're at the Tamarack Lodge in a Catskills of long ago listening to a crazed Borscht Belt comedian. And finally you're listening to a mystic intoning prophecies from deep in the reaches of a dream. I love poetry that takes me through such a range of voices, guises, poses, intensities, and diapasons, yet also manages to make me feel that I am in the presence of a truly human and truly real and singular personality. These poems were written by a man world in language and in a body. He wants to share this pleasure with us—and that is generous, and as good a reason for writing poems as any I can think of."—Geoffrey Nutter "Matthew's poems wake us up with brutal honesty and humor. If you think poetry has lost touch with everyday life, this book will restore your faith and welcome you back."—Rob MacDonald Exhibit A Schiffer Pub Limited

Early in the 21st century, after the Great Recession, poet and young mother Maggie Roche is harassed by a lovely woman, Sriyanie, and a famous neuroscientist, David Elfield. She doesn't know it yet, but she is about to become history's first time traveler. When agents from the far future attempt to kill her, in baffled fury she slingshots herself into the 7th millennium. Instantly she's on the run from the UII Lords and their virtual reality devotees. These superbeings are cyborged humans constructed to live forever, with the ambition to rule the universe. Maggie is having none of this. Encountering an earlier version of Sriyanie, her fated future role in the formation of the multiverse falls upon her shoulder like a thunderous lightningbolt. A Being at the end of time she calls the Something wages endless war with its foes, the UII Lords. Torn from her beloved child and her own time, Maggie must choose whether to accept this alienating path into an alternative cosmic history fit for a poet and a free woman. "The more you transform your life from the material to the spiritual domain, the less you become afraid of death. " Leo Tolstoy spoke these words, and they became Henry Stuart 's raison d'etre. The Poet of Tolstoy Park is the unforgettable novel based on the true story of Henry Stuart 's life, which was reclaimed from his doctor 's belief that he would not live another year. Henry responds to the news by slogging home barefoot in the rain. It 's 1925. The place: Canyon County, Idaho. Henry is sixty-seven, a retired professor and a widower who has been told a warmer climate would make the end more tolerable. San Diego would be a good choice. Instead, Henry chose Fairhope, Alabama, a town with utopian ideals and a haven for strong-minded individualists. Upton Sinclair,

inhabitants. Henry bought his own ten acres of piney woods outside Fairhope. Before dying, underscored by the writings of his beloved Tolstoy, Henry could begin to "perfect the soul awarded him" and rest in the faith that he, and all people, would succeed, "even if it took eons. " Human existence, Henry believed, continues in a perfect circle unmarred by flaws of personality, irrespective of blood and possessions and rank, and separate from organized religion. In Alabama, until his final breath, he would chase these high ideas. But first, Henry had to answer up for leaving Idaho. Henry 's dearest friend and intellectual sparring partner, Pastor Will Webb, and Henry 's two adult sons, Thomas and Harvey, were baffled and angry that he would abandon them and move to the Deep South, living in a barn there while he built a round house of handmade concrete blocks. His new neighbors were perplexed by his eccentric behavior as well. On the coldest day of winter he was barefoot, a philosopher and poet with ideas and words to share with anyone who would listen. And, mysteriously, his "last few months" became years. He had gone looking for a place to learn lessons in dying, and, studiously advanced to claim a vigorous new life. The Poet of Tolstoy Park is a moving and irresistible story, a guidebook of the mind and spirit that lays hold of the heart. Henry Stuart points the way through classroom textbook and as an onboard reference handbook. This life 's puzzles for all of us, becoming in this timeless tale a character of such dimension that he seems more alive now than ever. Foreign Import Duties ... Over half a million Jews entered the U.S. Armed Forces during the Second World War. They joined every branch of the military and saw action on all fronts. Author Moore describes the struggles these GI Jews faced, having to battle not only the enemy but also the

prejudices of their fellow soldiers. Through memoirs, oral histories, and letters, Moore charts the lives of fifteen young Jewish men as they faced military service and tried to make sense of its demands. From confronting pork chops to enduring front-line combat, from the temporary solace of Jewish worship to harrowing encounters with death camp survivors, we come to understand how these soldiers wrestled with what it meant to be an American and a Jew. These men challenged perceptions of Jews as simply victims of the war, and encouraged Jews throughout the diaspora to fight for what was right.--From publisher description.

Discover (or rediscover) the fun and magic of building electronic circuits with thermatrons (vacuum tubes). This book has everything you need to know about the art and science of thermatron design and construction. It pulls together, in one easy to read book, thermatron types and characteristics, thermatron homebrew techniques, and how to design audio and RF triode and pentode circuits. The book is written primarily for radio amateurs (or audio equipment builders) that already understands basic electronics but have forgotten or never had the pleasure of working with hollow-state devices. The Second Edition includes over 50+ pages of new and revised material including a new chapter on thermatron oscillator design.

A Patch of Green Pearson Education Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism, subversion and, as Cecil Beaton described, 'his grotesque little gamines', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era -glamorous, hardedged, cleverly spiced with vulgarity.. .rich with implied narratives and strong erotic undercurrents' Practical Antenna Handbook 5/e Key Porter
