**Auditing EDP Systems** Facet Publishing  
At a time when increased independence requirements for auditors, legal backing for auditing standards, and increased audit documentation requirements have occurred, this book examines key issues in the market for audit services in Australia. It investigates issues including: the understandability of audit and the state of the audit expectations gap; auditors' business acumen and industry expertise; the auditors' use of materiality; whether or not the increasingly prescriptive nature of auditing is creating a distraction from the 'real' audit task and stifling auditors' judgement; whether or not CLERP 9 reforms involving audit partner rotation and restrictions on non-audit service provision are efficient and effective and reactions to the increasing scrutiny of auditors and audit firms by

regulators. With its thorough coverage of contemporary issues, this book intersperses the authors' summaries, interpretations and recommendations with the perceptions, expressed in their own words in order to faithfully convey their candid assessments, of users of audit reports, purchasers and suppliers of the audit product, auditing standard setters and regulators of the audit market.

**Auditing: A Risk Based-Approach to Conducting a Quality Audit** Springer  
**Modern Auditing & Assurance Services**, 6th edition, is written for courses in auditing and assurance at undergraduate, postgraduate and professional levels. The practice of auditing is explained in the context of auditing theory, concepts and current practice, with appropriate reference to the Australian auditing standards and the respective international standards on auditing. Auditors play a vital role in the current economic environment, with increasing responsibility for ensuring market integrity. The development of auditing practice reflects how the accounting profession responds to the complex demands of information, competition, corporate failures and technology. Auditing continues to

Whistleblowing, Communication and Consequences offers the first in-depth analysis of the most publicized, and morally complex, case of whistleblowing in recent European history: the Norwegian national lottery, Norsk Tipping. With contributions from the whistleblower himself, as well as from key voices in the field, this book offers unique perspectives and insights into not only this fascinating case, but into whistleblowing and wrongdoing in organizations more broadly. An international team of scholars use fourteen different theoretical lenses to show the complex and multi-faceted nature of whistleblowing. The book begins with an ethnographic account by the whistleblower story and proceeds into an analysis of the literature and conceptual topics related to that whistleblowing incident to present the lessons that can be learnt from this extreme example of institutional failure. This fascinating, complex, and multi-theoretical book will be of great interest to scholars, students and industry leaders in the areas of public relations, corporate communication, leadership, corporate social responsibility, whistleblowing and organizational resistance.

Materials and Processes ANU E Press

### Auditing and Assurance Services in Australia, Sixth Edition Revised Cengage Learning

In resource poor, cost saving times, this book provides practical advice on new methods and technologies involved in systematic searching and explores the role of information professionals in delivering these changes. The editors bring together expert international practitioners and researchers to highlight the latest thinking on systematic searching. Beginning by looking at the methods and techniques underlying systematic searching, the book then examines the current challenges and the potential solutions to more effective searching in detail, before considering the role of the information specialist as an expert searcher. Systematic Searching blends theory and practice and takes into account different approaches to information retrieval with a special focus being given to searching for complex topics in a health-related environment. The book does not presume an in-depth prior knowledge or experience of systematic searching and includes case studies, practical examples and ideas for further research and reading. The book is divided into three parts: Methods covers theoretical approaches to evidence synthesis and the implications that these have for the search process, including searching for complex topics and choosing the right sources. Technology examines new technologies for retrieving evidence and how these are leading to new directions in information retrieval and evidence synthesis. People considers the future of the information specialist as an expert searcher and explores how information professionals can develop their skills in searching, communication and collaboration to ensure that information retrieval practice is, and remains, evidence-based. Systematic Searching will be essential reading for library and information service providers and information specialists, particularly those in a health-related environment.

It will also be of interest to students of library and information science, systematic reviewers, researchers and practitioners conducting complex searches in settings including social care, education and criminal justice.

Keeping Capital Markets Efficient MDPI

This book examines and explains the intellectual capital reporting practices, with a human capital focus, of firms located in the developing nation of Sri Lanka. The study ascertains the following: first, to what extent the industry groups, based on the number of shareholders, differ in their ICR practices; and second, to what extent firms in Sri Lanka differ from counterparts in other nations in their intellectual capital reporting practices. An important aspect of this book is looking at the practices from a critical perspective to providing a more balanced view of 'good' and 'bad' effects of intellectual capital. The book meticulously outlines an extensive literature review, research methods, the theoretical perspective, findings with an engaging discussion, and concluding remarks. Indra Abeysekera's fine research project is an impressive contribution to an emerging area of interest throughout academia and industry. The product of one of the world's most comprehensive research projects on whistleblowing, evidence from over 8,000 public servants in over 100 federal, state and local government agencies shows that whistleblowers can and do survive, and that often their role is highly valued. Public sector managers face significant challenges in better managing and protecting whistleblowers. There is great variation between the many public agencies making the effort, and the many agencies where the outcomes - for managers and whistleblowers alike - are still likely to be grim. This book is compulsory reading for all public sector managers who wish to turn this negative trend around, and for anyone interested in public accountability generally.

Krambia-Kapardis shows how evidence-based, multi-level micro and macro analysis of fraud risk and protective factors inform effective fraud prevention, in turn minimizing financial catastrophes.

The Future of Audit Edward Elgar Publishing

By the year 2000, the world had built more than

45,000 large dams to irrigate crops, generate power, control floods in wet times and store water in dry times. Yet, in the last century, large dams also disrupted the ecology of half the world's rivers, displaced tens of millions of people from their homes and left nations burdened with debt. Their impacts have inevitably generated growing controversy and conflicts. Resolving their role in meeting water and energy needs is vital for the future and illustrates the complex development challenges that face our societies. The Report of the World Commission on Dams: - is the product of an unprecedented global public policy effort to bring governments, the private sector and civil society together in one process - provides the first comprehensive global and independent review of the performance and impacts of dams - presents a new framework for water and energy resources development - develops an agenda of seven strategic priorities with corresponding criteria and guidelines for future decision-making. Challenging our assumptions, the Commission sets before us the hard, rigorous and clear-eyed evidence of exactly why nations decide to build dams and how dams can affect human, plant and animal life, for better or for worse. Dams and Development: A New Framework for Decision-Making is vital reading on the future of dams as well as the changing development context where new voices, choices and options leave little room for a business-as-usual scenario.

Corporate governance, executive pay, child labour and control of industrial pollution are issues that all companies must face. While the issues themselves have been widely discussed, the process by which they develop is a much less discussed area. A key to being a sustainable company is the capacity to understand and predict how such issues develop. This book examines the development of a number of issues and draws lessons which companies in the future can use.
