This book contains 11 carefully revised and selected papers from the 5th Workshop on Global Sourcing, held in Courchevel, France, March 14-17, 2011. They have been gleaned from a vast empirical base brought together by leading researchers in information systems, strategic management, and operations.

This volume is intended for use by students, academics, and practitioners interested in the outsourcing and offshoring of information technology and business processes. It offers a review of the key topics in outsourcing and offshoring, populated with practical frameworks that serve as a tool kit for students and managers. The topics discussed combine theoretical and practical insights, and they are extensively illustrated by case studies from client and vendor organizations. Last but not least, the book examines current and future trends in outsourcing and offshoring, paying particular attention to how innovation can be realized in global or outsourced software development environments.

The fifth edition of AUDIT SAMPLING continues to provide an important bridge between basic introductory auditing texts and the level of highly technical professional knowledge necessary to handle audit sampling applications in actual practice. Written from the standpoint of internal and external auditors, the information is easy-to-understand by entry-level auditing students, yet also appropriate for an advanced or graduate level auditing course. Updated to reflect the rapidly changing audit environment, the fifth edition offers the following new features: \* The latest information on new technology and techniques for testing controls \* Reflects the revisions of SAS No. 55 made by SAS No. 94. \* Significant discussion of setting materiality and relating that to tolerable misstatement, including a discussion of SAB No. 99 \* Information on changes in practice regarding the use of nonstatistical sampling \* New examples and cases The book companion web site includes data sets for cases particularly appropriate for solving with Excel. The actual cases are identified by an icon in the text. The web site also contains an Instructor's Resource Manual.

Auditors from any industry must "learn the language of upper management" if they truly want to affect positive change throughout their environments. If quality auditors want to remain relevant and keep from becoming marginalized, they need to add new skills and credentials, and even more importantly, move beyond conformance monitoring to determine how their work might impact the corporate bottom line. The purpose of this book is to accept that challenge in presenting two ways that auditors can "learn [to speak] the language of upper

management" either by helping to drive continuous improvement or by helping to manage risk.

This book has essential information that will help guide an organization's efforts to glean more value from their audit process. It helps grow the audit function beyond verification audits. It provides insight for using the audit function to improve organizations using lean principles. It also discusses how the audit function can contribute to and be formally integrated into the ongoing risk management program. This book is about advancing the profession of auditing, as well as the skills of individual auditors. "Buy. Read. Reread. It will kick start your risk-based thinking journey. Then, buy the book for each member of your auditing team." Greg Hutchins, PE

Director, Certified Enterprise Risk Manager Academy "While there is a constant influx of books on auditing entering the market today, *Advanced Quality Auditing: An Auditors Review of Risk Management, Lean Improvement and Data Analysis* stands out among them as Lance excels at demonstrating to readers how they can embrace the methodologies for continual improvement as they apply to the audit program and audit professionals. By combining the use of the audit

checklist development matrix tool (ACDM) and various lean tools that are traditionally applied to processes other than auditing, auditors can ensure they not only audit for compliance but also add value to the audits, demonstrating the value of audit program, and in turn, themselves...The clarity of explanation and illustrative charts and diagrams of the Kano model makes it easy for the beginning auditor to understand and implement, while providing deeper insights to experienced auditors in how to leverage the model in the continual improvement of the audit program. Lance clearly makes the case that as audit professionals we should all embrace the use of the Kano model and apply it to our own audit programs to ensure we are always positioned to

delight our customers." Nancy Boudreau ASQ Audit Division Chair (2014-2015) Lance Coleman has taken a traditional topic on auditing and written a professional synopsis of key concepts in terms so clear as to make them understandable and useful to the reader. Auditing and assurance service education has undergone dramatic change in at least three ways: (1) An awakening that practitioners have a comparative advantage in offering professional services that transcend the boundaries of financial statements; (2) An understanding that client strategies affect engagement risk; and (3) A transition away from first-person delivery by classroom instructors only and toward third-person discovery by students both within and outside of the classroom. Each has influenced the seventh edition. To transcend the boundaries of financial statements, Auditing and Assurance Services exposes students both to the demand for and the supply of the profession's flagship service, financial statement audits, and to the nature of the value-added assurance services decision makers demand in the information age.

Auditing: Text and Cases will influence the way that the next generation of professionals think about their responsibilities and abilities; it is not limited to reciting current practice. Instead the unique set of topics and structure of this book will strike an effective balance among the "why it is so" of auditing theory and the "how it is done" of current auditing practice and the "what's next" of the profession's future.
