Application for Employment I refer to the
recent death of the Technical Manager at your
company and hereby apply for the
replacement of the deceased manager. Each
time I apply for a job, I get a reply that there is
no vacancy but in this case I have caught you
red-handed and you have no excuse because I
even attended the funeral to be sure that he
was truly dead and buried before applying.
Attached to my letter is a copy of my CV and
his death certificate. Crap CVs is a hilarious
compilation of the worst job applications
imaginable, including overly-honest cover
letters, embarrassing typos, mortifying personal
revelations, awkward interview questions,
misplaced self-confidence, self-aggrandizing
gibberish, blatant truth-twisting and, of course,
outright lies.

According to Dr. Lydon, the best way to
cure illness is to prevent it. And illness
prevention begins with good nutrition,
weight management, and fitness. This
book presents Dr. Lydon's simple, proven
prescription for women who want to look
their best, feel their best, and live a long,
healthy life.

The economic activities of humanity,
particularly during the last couple of cen-

turies, have had a profound impact on the
natural environment. Fast depletion of the
world's forest resources, fish stocks, fossil
fuels and mine deposits have raised many
moral as well as practical questions
concerning present and future generations.
Furthermore, a number of global
environmental problems such as acid rain,
the 'greenhouse effect' and depletion of the
ozone layer are causing concern
throughout the world. What does
economics say about the exploitation of
nature's scarce resources? This book,
which is a much expanded version of an
earlier publication, *Economics of Natural
Resources and the Environment*, aims
mostly at final-year undergraduates
reading subjects such as economics,
business studies, environ mental science,
forestry, marine biology, agriculture and
development studies. There is also a good
deal of material - especially in the chapters
on fisheries, forestry, valuation and
discounting - that post-graduate students
may find useful as stepping-stones. The
material presented stems from my lectures
to final-year students at the University of
Ulster during the last 12 years, and some
of my ongoing research work. When I
moved to Northern Ireland in 1982 I was
given a course called 'Economics of
Exhaustible Resources' to teach. This has
changed its title and focus a number of
times along with the structure of the
University. My early reading lists included a
number of journal articles and books
written on the sub ject.

India's history and culture is ancient and
dynamic, spanning back to the beginning
of human civilization. Beginning with a
mysterious culture along the Indus River
and in farming communities in the
southern lands of India, the history of India
is punctuated by constant integration with
migrating peoples and with the diverse
cultures that surround the country. Placed
in the center of Asia, history in India is a
crossroads of cultures from China to
Europe, as well as the most significant
Asian connection with the cultures of
Africa. The *Historical Dictionary of Ancient
India* provides information ranging from
the earliest Paleolithic cultures in the
Indian subcontinent to 1000 CE. The
ancient history of this country is related in

this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

This illustrated work covers the stories of five British engineering companies that produced successful ranges of agricultural, earthmoving or construction machinery. County, Doe, Chaseside, Muir-Hill, Matbro and Bray all made extensive use of the Ford tractor skid unit as a basis for their machines and they pioneered the development of the four-wheel drive agricultural tractor in Britain. Stuart Gibbard gives details of all the main models and machines of these manufacturers. He chronicles the fortunes of the firms from the beginning of the 20th century to the present day and discusses many of the personalities involved.

Crap CVs Rowman & Littlefield

Did you know that the world's first submarine traveled the Thames River in England way back in 1615? Or that early cars had three wheels instead of four? Get ready to learn the fascinating stories behind inventions you use every day.

From the motorcycle inventor who died while riding his creation to the engineers who figured out a better way to launch humans into space, you'll find out how we got the transportation inventions that get us where we're going.

Epic Turtle Tales (Teenage Mutant Ninja Turtles) Phidal

Tractors of the World is a comprehensive guide to more than 220 of the best-known tractors produced throughout the world over the last 120 years. It is illustrated with more than 400 color and black-and-white photographs and artwork; cutaway illustrations; and comprehensive specifications give technical and engineering information.
