Oceania: Countries and Territories - Map Quiz Game: What the Oceania region lacks in population, it more than makes up for in territory. It may not look like it from the map, but a flight from one end of the region to the other takes over 20 hours! Of course, most of that territory is under water. Many of the islands have very small populations.

[Australia And Oceania Physical Features](#)

The most diverse country of Oceania when it comes to the environment is Australia, with tropical rainforests in the north-east, mountain ranges in the south-east, south-west and east, and dry desert in the centre.

**Australia and Oceania Physical Features Flashcards | Quizlet**

The name of NZ's highest peak has been gazetted by the New Zealand Geographic Board as Aoraki/Mt Cook. The Board often designates alternate English and Maori names that can be used interchangeably and are considered equally correct, such as "Mt Taranaki or Mt Egmont", but Aoraki/Mt Cook is unusual in that it has been designated one single, joint, name; these are not alternates.

[Australia and Oceania: Physical Geography](#)  
Most of Australia and Oceania is under the Pacific, a vast body of water that is larger than all the Earth's continental landmasses and islands combined. The name "Oceania" justly establishes the Pacific Ocean as the defining characteristic of the continent.

Australia is a continent and an island located in Oceania between the Indian Ocean and the South Pacific Ocean. It shares its name with the country that claims control over it. Properly called the Commonwealth of Australia, its territory consists of the entire continent and smaller outlying islands.
