Australian National Bibliography Springer

In recent years, Corporate Social Responsibility (CSR) reporting in China has been experiencing a rapid development and the number of social reports issued by Chinese enterprises shows a sharp increasing trend. This book investigates the evolution of such reporting practice in the country and the reasons behind it. In addition, it also examines the reporting quantity and quality of Chinese enterprises by applying the GRI (Global Reporting Initiative) as an evaluation tool. In response to policy documents so as to obtain the government's recognition and to strive for more resources, state-owned enterprises, private enterprises and foreign-invested companies have made substantial efforts in social reporting in terms of quantity and coverage. However, it appears that there is still room for enhancing the quality of disclosure. The book also highlights the central government's economic, political and social roles in promoting, encouraging and controlling the development of CSR reporting.

An Introduction to Accounting:

Accountability in Organisations and Society

John Wiley & Sons

Written by one of ANZ 's premier sustainability and social accounting academics, An Introduction to Accounting: Accountability in Organisations and Society brings today 's accounting hot topics of corporate accountability, sustainability and social responsibility to life with the only complete textbook created from the ground up for these modern accounting teaching and learning concepts. An Introduction to Accounting: Accountability in Organisations and Society takes a unique approach in embracing from the start the notion of accountability for the environment and sustainability in accounting; the structure, content and learning activities provide students with an understanding of accounting 's pervasive and transformative role as a social practice and organisational driver. It shows that environments, ideas and values change; the interconnectivity of society; that the planet must be respected as a resource; and that people are affected/influenced by the information they receive and the way it is presented. It is

emphasised that accounting and accountability are key aspects of every person's life and that the practice of accounting, while often being seen as very technical in nature, has many social implications. Learning accounting through the lens of sustainability and the environment embeds this perspective in students' minds so that in their careers they will actively seek and use accounting information to make decisions that take into consideration accountability for the environment. Australian Financial Accounting Wiley

The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the

accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.

Utilities Reform in Twenty-First Century Australia Routledge

This book explores the circus as a site in and through which science and technology are represented in popular culture.

Across eight chapters written by leading scholars – from fields as varied as performance and circus studies, art, media and cultural history, and engineering – the book discusses to what extent the engineering of circus and performing bodies can be understood as a strategy to promote awe, how technological inventions have shaped circus and the cultures it helps constitute, and how much of a mutual shaping this is. What kind of cultural and aesthetic effects does engineering in circus contexts achieve? How do technological inventions and innovations impact on the circus? How does the link between circus and technology manifest in representations and interpretations – imaginaries – of the circus in other media and popular culture? Circus, Science and Technology examines the ways circus can provide a versatile frame for interpreting our relationship with technology.

World Population to 2300 SAGE

Financial Accounting Theory
Routledge

Utilities Reform in 21st Century Australia: Providing the Essentials traces the development and consequences of the economic reform measures undertaken in the utilities sector in Australia (communications, energy, water/wastewater services, and transport) in the last years of the 20th century, and early decades of the 21st century. In doing so, it looks at the process of reform across industries, and across the state and federal jurisdictions, to identify what motivations the various governments had for pursuing reform, how change varied across jurisdictions, and what issues arose in the process. Although by the mid-1990s all states and territories and the Australian Government were committed to reforming utilities as part of the National Competition Policy, not all pursued this reform with the same degree of speed and breadth of action. The broad trends of economic reform in Australia, and abroad, are also touched upon, to provide an outline of the wider context in which the reform of the utilities occurred. This book, therefore, explores the relationship between politics and society on the one hand and economic reform on the other; as well on as the efforts of governments in Australia to promote economic growth and the wealth of Australians in an increasingly complex

The Routledge Companion to Accounting, Reporting and Regulation Financial Accounting Financial accounting in Australia, preparing financial statements, understanding and applying accounting standards, understanding the Conceptual Framework for Financial Accounting, accounting for corporate social responsibility. Australian Financial Accounting Australia's market-leading financial accounting text provides students with a detailed grasp of reporting requirements in an accessible and engaging manner. Fully updated throughout, AUSTRALIAN FINANCIAL ACCOUNTING further develops and extends its coverage of consolidations and encompasses topical issues such as social and environmental accounting. Renowned for his clear writing style, Craig Deegan successfully communicates the detail necessary to understand, challenge and critically evaluate financial reporting. Complete in theoretical and practical coverage, this text gives students a strong foundation for current study and their future professional lives. Sustainability Accounting and Accountability The much anticipated fourth edition of Craig Deegan's Financial Accounting Theory delivers authoritative and completely up to date material with the discussion of

both existing theories and newer theories that have surfaced as financial reporting has become more international. This edition includes a new selection of modern 'Accounting Headlines' which provide current examples of organisations and individuals putting accounting theory into practice in both local and global settings. Financial Accounting Theory covers additional topics such as critical perspectives, public sector accounting and fair value. Workflows and processes are presented using enhanced visual charts to help demonstrate how accounting works in practice. Deegan presents the concepts in a clear and straightforward style, while challenging students to think critically about the range of accounting theories. Financial Accounting Theory provides a sound basis for readers contemplating further research and develops habits of analytical reasoning and critical thinking. Financial Reporting Handbook 2020 Australia Cengage AU Ethics and Auditing examines ethical challenges exposed by recent accounting and auditing 'lapses' through a study of interconnected moral, legal and accounting issues. The book aims to engage a broad readership in the discussion of audit failure and reform. With its range of intellectual and practical perspectives, Ethics and Auditing provides critical analyses of auditor independence,

conflicts of interest, self-regulation, the setting and enforcing of auditing standards, and ethics education.

Together, these are part of the suite of products and services available to Chartered Accountants ANZ members and the student and business community.

APAIS, Australian Public Affairs Information Service McGraw-Hill Education Australia

Historically, the study of corporate social responsibility (CSR) reporting has largely been within the context of Western economies. However, in the wake of highly publicized incidents such as Bhopal and the struggle of the Ogoni people in Nigeria, many large corporations now claim to be taking steps to improve their environmental and social performance within developing countries. Using the lens of stakeholder theory, this book examines whether the current practice of CSR reporting in

developing countries is motivated by a desire to discharge accountability to all relevant stakeholders or whether it is being driven by the imperative of advancing corporate economic interests. While concepts like CSR reporting have become more fashionable, they vary widely in different national contexts; this book therefore clarifies the types and roles of CSR reporting and the underlying corporate motivations. The author considers the current CSR reporting practices in a number of developing countries, with particular attention given to illuminating a case study of Bangladesh.
