and focus it to a point 17 feet away, everything between 9 feet and infinity will be in focus.

Manual Focus or Automatic Focus? - CaptureLandscapes

Autofocus and manual focus do exactly the same thing: they adjust the focus of your camera's lens. But, with the former, the camera itself determines the sharpest focus using sensors devoted to measuring it. In autofocus mode, the photographer doesn't have to do anything. In manual mode, the photographer has to adjust the lens' focus by hand.
