How to Set Your Camera to Auto ISO Mode (And When to Use it)

The Auto ISO Mode is a feature on some cameras where the camera decides what should be the optimum ISO for

the exposure. The camera reads the aperture and the shutter speed in use and then depending on the scene and the metering mode, dials in the ISO number it feels is right. Typically, the photographer sets the ISO, but in some situations, it is best to hand over the decision-making process to the camera and switch to the Auto ISO Mode.
