Automate the Boring Stuff with Python Programming Course ...
The keys(), values(), and items() Methods. There are three dictionary methods that will return list-like values of the dictionary's keys, values, or both keys and values: keys(), values(), and items().The values returned by these methods are not true lists: they cannot be modified and do not have an append() method. But these data types (dict_keys, dict_values, and dict_items, respectively ...

Automate the Boring Stuff with Python: Albert Sweigart
This is an exercise in the Automate The Boring Stuff book. I am supposed to create a function that takes a list value as an argument and returns a string with all the items separated by a comma and a space, with 'and' inserted before the last item. My code also includes a loop for the user to create their list.
Automate the Boring Stuff with Python

written for people who want to get up to speed writing small programs that do practical tasks as soon as possible. You don't need to know sorting algorithms or object-oriented programming, so this course skips all the computer science and concentrates on writing code that gets stuff done.
