This chapter introduces the automotive system, which is unlike any other, characterized by its rigorous planning, architecting, development, testing, validation and verification. The physical task of writing embedded software for automotive applications versus other application areas is not significantly different from other embedded systems, but the key differences are the quality standards which must be followed for any development and test project. To write automotive software the engineer needs to understand how and why the systems have evolved into the complex environment it is today. They must be aware of the differences and commonalties between the automotive submarkets. They must be familiar with the applicable quality standards and why such strict quality controls exist, along with how quality is tested and measured, all of which are described in this chapter with examples of the most common practices. This chapter introduces various processes to help software engineers write high-quality, fault-tolerant, interoperable code such as modeling, autocoding and advanced trace and debug assisted by the emergence of the latest AUTOSAR and ISO26262 standards, as well as more traditional standards such as AEC, OBD-II and MISRA.

When Dan set out to drive his Jeep from the Northern tip of Alaska to Tierra

del Fuego on the Southern tip of South America, he had no idea how much the adventure would change his life. Over the course of two years, Dan's expedition spanned forty thousand miles through sixteen countries. Now he will never be the same. After years of saving, dreaming and planning, Dan wanted to find out if an ordinary guy can achieve the extraordinary. With no sponsorship, a modest savings account and a willingness to learn Spanish, Dan threw himself in. Going solo, with no GPS and sleeping in a ground tent, Dan wanted to experience everything the Americas have to offer. From poking lava with a stick and hiking among world-famous mountains to corrupt military and camping with Ecuadorian locals - every day provided something new. With his eyes and ears open to the world around him, Dan met many interesting and thought-provoking characters. With their guidance and prodding, and by using their unique perspective, Dan was able to learn many valuable life lessons. Running to the beat of a different drum, Latin America was the perfect classroom for Dan to view our modern work-a-day world through an entirely new lens.
