If you're thinking about buying this book, it's probably because it feels like something's missing in your career. Guess what? It could be YOU. Whether you're living for the weekends or counting the minutes until 5 pm every day, life is too short to wish it away because you feel stuck in your job. The good news is that you have the power to stop living on autopilot and turn your career around. "Follow your passion," "find your purpose," and "do what you love" have joined the parade of bland directives that aren't doing much to actually help you figure out what you're meant to do with your career. Instead, they only create more confusion. If all we had to do is "follow our bliss" . . . why aren't we blissful yet? The truth is, the best career is not one where you only do what you love, but one where you honor who you are. In *You Turn*, counterterrorism professional turned career coach Ashley Stahl shares the strategies she's used to help thousands ditch their Monday blues, get clarity on what work lights them up, and devise an action plan to create a career they love. This book gives readers access to Stahl's coveted 11-step roadmap that has guided thousands of coaching clients in 31 countries to self-discovery and success. Throughout her process, you'll:

- Discover your Core Skillset. Uncover your gifts and talents to create an intentional career path that's fulfilling and aligned with who you are—and what you're good at.
- Understand your "Inner Money Blueprint." Discover the root of your money mindset, and how to break free of financial limitation.
- Clarify your Core Interests. Identify the difference between a passion, gift, and calling so you can get clear on what's meant to be a hobby—and what's meant to be a career!
- Become your own coach. Walk away with a unique set of tools for staying true to your best self in times of stress, frustration, or anxiety. They were responsible for one of the first functioning automobiles, if not the first, in the United States. After building their automobile in 1894, the three men formed the Haynes-Apperson Automobile Company in Kokomo, Indiana, one of the first car manufacturing companies in the country. Three years after incorporation, a dispute over money caused the partnership to split up and Edgar and Elmer Apperson formed their own company. Both companies lasted until the mid-1920s. This book is a history of these automotive pioneers and their companies: the Haynes-Apperson Automobile Company, the Haynes Automobile Company, and the

Apperson Brothers Automobile Company. It is richly illustrated with photographs of the factories, automobiles, personalities and advertisements. Fair Credit Reporting Act--1973 BenBella Books The twentieth-century American experience with the automobile has much to tell us about the relationship between consumer capitalism and the environment, Tom McCarthy contends. In *Auto Mania* he presents the first environmental history of the automobile that shows how consumer desire (and manufacturer decisions) created impacts across the product lifecycle--from raw material extraction to manufacturing to consumer use to disposal. From the provocative public antics of young millionaires who owned the first cars early in the twentieth century to the SUV craze of the 1990s, *Auto Mania* explores developments that touched the environment. Along the way McCarthy examines how Henry Ford's fetish for waste reduction tempered the environmental impacts of Model T mass production; how Elvis Presley's widely shared postwar desire for Cadillacs made matters worse; how the 1970s energy crisis hurt small cars; and why baby boomers ignored worries about global warming. McCarthy shows that problems were recognized early. The difficulty was addressing them, a matter less of doing scientific research and educating the public than implementing solutions through America's market economy and democratic government. Consumer and producer interests have rarely aligned in helpful ways, and automakers and consumers have made powerful opponents of regulation. The result has been a mixed record of environmental reform with troubling prospects for the future.
