Across the Soviet Bloc, from the 1960s until the collapse of communism, the automobile exemplified the tension between the ideological imperatives of political authorities and the aspirations of ordinary citizens. For the latter, the automobile was the ticket to personal freedom and a piece of the imagined consumer paradise of the West. For the authorities, the personal car was a private, mobile space that challenged the most basic assumptions of the collectivity. The "socialist car"-and the car culture that built up around it-was the result of an always unstable compromise between official ideology, available resources, and the desires of an increasingly restless citizenry. In *The Socialist Car*, eleven scholars from Europe and North America explore in vivid detail the interface between the motorcar and the state socialist countries of Eastern Europe, including the USSR. In addition to the metal, glass, upholstery, and plastic from which the Ladas, Dacias, Trabants, and other still extant but aging models were fabricated, the socialist car embodied East Europeans' longings and compromises, hopes and disappointments. The socialist car represented both aspirations of overcoming the technological gap between the capitalist first and socialist second worlds and dreams of enhancing personal mobility and status. Certain features of automobility-shortages and privileges, waiting lists and lack of readily available credit, the inadequacy of streets and highways-prevalled across the Soviet Bloc. In this collective history, the authors put aside both ridicule and nostalgia in the interest of trying to understand the socialist car in its own context.

Michael Swanson ' s online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this -- one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners -- there is a chapter on "Astronomy Basics" -- and experts alike. Celestron ' s NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron ' s new range made it one of the two dominant manufacturers of affordable "go to" telescopes.

This book contains information necessary to the proper handling and care of your Ford car. Read it carefully--particularly the instructions on lubrication, the cooling system, care of battery, etc., which are absolutely necessary to economical and satisfactory operation. Your car is a splendid piece of machinery. If properly cared for, it will give you years of satisfactory service at little cost. When repairs are needed, we recommend having the work done by an authorized Ford dealer. They are provided with special service equipment. Furthermore they are interested, more than any one else, in your personal satisfaction with the car. Let experienced mechanics make repairs or adjustments. Your car is too valuable a piece of machinery to place in unskilled hands. Expert workmanship is just as essential in servicing your car as it is in building it.
