the latest achievements in the fields of science, technology, languages. Many papers also prove the positive impact of robotics on the students' interests and competence development. The presented approaches cover the whole educative range from kindergarten to the university level and lifelong learning.

in research and development in educational robotics presented at the 13th International Conference on Robotics in Education (RiE), which was carried out as a purely virtual conference from April 27 to 28, 2022. Researchers and educators will find valuable methodologies, experiences, and tools for robotics in education that encourage learning environments and

technology, engineering, arts, and mathematics (STEAM) through the design, creation, and programming of robots addressing real-world societal needs. Social robotics is becoming an important topic in education as well. This also involves various modern technologies ranging from robotics platforms to programming environments and

"This is an important and
timely book. With half of

humanity living in cities, our
future will depend on how
well we manage our cities.
This book poses six inter-
generational challenges to
cities. If a city deals
successfully with them, it will
become a living, thriving,
prosperous and delightful
place to live, work and visit."

This lively book explores
individual and societal changes
in contemporary China through
the compelling personal
accounts of young Chinese
journalists. China's media are

central to public life in the most populous nation on earth, and have also become increasingly relevant to communication and understanding on a global scale. Through a series of engaging oral histories, Judy Polumbaum puts a human face on vital political and philosophical issues of freedom of expression and information that will shape China's future. The author's extended and frank conversations with journalists from a range of news outlets reveal diversity, passion, humor, and optimism that belie the stereotype of journalists as cogs in a rigidly controlled machine. Neither dissidents nor paragons but rather people working day in and day out within China's existing and evolving media, these talented and ambitious reporters open new windows to understanding Chinese journalism and intellectual life. Some of their tales could happen only in China; others will resonate with readers everywhere. As the first book to explore experiences and ideas of everyday journalists who are helping to shape their rapidly changing country, this unique and timely work will appeal to all those interested in China's dynamic society.

The Chinese Dream AuthorHouse
This book seeks to contribute to prior research facing the discussion about public value creation in Smart Cities and the role of governments. In the early 21st century, the rapid transition to a highly urbanized population has made societies and their governments around the world to be meeting unprecedented challenges regarding key themes such as sustainability, new governance models and the creation of networks. Also, cities today face increasing challenges when it comes to providing advanced (digital) services to their constituency. The use of information and communication

technologies (usually ICTs) and data is thought to rationalize and improve government and have the potential to transform governance and organizational issues. These questions link up to the ever-evolving concept of Smart Cities. In fact, the rise of the Smart City and Smart City thinking is a direct response to such challenges, as well as providing a means of integrating fast evolving technology into our living environment. This focus on the public value creation in Smart Cities could be of interest for academics, researchers, policy-makers, public managers, international organizations and technical experts involved in and responsible for the governance,

development and design of Smart Cities
Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 1996 Springer Science & Business Media
Includes various special sections or issues annually:
1968- Harvesting issue (usually no. 7 or 8); 1968- Crop planning issue (usually no. 12; title varies slightly); Machinery management issue (usually no. 2); 1970- Crop planting issue (usually no. 4; title varies slightly).
Resources in Education

Springer
Drawing from global insights and the education supply and demand theory, this book investigates migrant children's education in China, as well as the educational financial policies, which serves as both a background and possible solutions. From a comparative perspective, the education fiscal policies regarding issues with migrant/immigrant students and inequality in the United States and Europe were first examined, before

comprehensive theoretical framework is constructed to evaluate the government and public schools' input and migrant children's educational demand in China. Their school choices, academic performances, educational choices and impact factors from the perspectives of class, gender, society and family are then discussed in depth. By tracing back to previous fiscal policies regarding migrant children in China and local policies in Beijing, Shanghai, Guangzhou and

Shenzhen, the author further interrogates the existing challenges, possible strategies and solutions. This book will appeal to scholars of education economics, education policy, educational equality and those who're generally interested in Chinese education and society.

The passion for the law as well as last 30 years of astonishing present is so all-consuming that the discipline you bring to economic growth and political fast realities threaten to eclipse the slow dream of tomorrow. this demanding profession and cultural reform are driven Taking as its starting point the goal announced in China in*

2001 to build 400 new cities of 1 million inhabitants each by 2020, or 20 new cities a year for 20 years, the book explores the hopes and hazards of dreaming on such a scale. The question being asked is in fact no less than how to build a new utopia. But is China mortgaging its present for a promised future, and doing so at the same time that current speeds of construction eclipse any real forward planning? The Chinese Dream is a visual tour de force, both encyclopedic in scope and holistic in approach. Cutting across all levels of scale? from individual to nation? and

backed by a truly multi-disciplinary team (encompassing architecture & urban planning, politics, economics, arts & culture, environmental concerns, and sociology) the book synthesizes a vast body of research to tackle the big questions of today, and to unpack the paradoxes at the heart of China's struggle for change."--Publisher's website
Automotive Industries, the Automobile Rowman & Littlefield Publishers
This book provides perspectives on depopulated areas and regional social

capital from positivistic field surveys. Among the developed countries of the world, Japan has a very small amount of national land, with almost 70% of it being in mountainous locations. Concentration of populations and economic capital into large metropolitan areas along with many depopulated and population-aged regions in the mountainous parts can be seen in the country. A very clear regional disparity has arisen in Japan, especially since the era of its high economic growth. This book also offers critical suggestions for the shrinking

societies of the developed world in the era of Society 5.0, the fifth stage of society where economic development is achieved and social issues are resolved by the fusion of cyber and physical space. To begin, the book refers to an outline of depopulation and depopulated areas in Japan. Then, it deals with issues of depopulation, out-migration from a mountainous village, revitalization of local industries, and maintenance of daily living functions in these areas. This book is suitable for students and scholars of the social sciences, regional planners, staffs of government

offices, members of NPOs, general citizens, and the many other people who are interested in sustainability of a region and a community in a shrinking social environment. *Legal Compilation; Statutes and Legislative History, Executive Orders, Regulations, Guidelines and Reports* Edward Elgar Publishing
Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting. *Biographical Dictionary of*

New Chinese Entrepreneurs and Business Leaders St. Martin's Griffin
Many effects of environmental and energy policy are likely to disproportionately burden those with low income. First, it raises the price of fossil-fuel-intensive products that constitute a high fraction of low-income budgets (like gasoline, heating fuel and electricity). Second, the handout of pollution permits to firms provides value to those who own them. Third, low-income individuals may

place more value on food and shelter than on improvements in environmental quality, so high-income individuals may get the most benefit of pollution abatement. Fourth, air quality improvements may raise the value of houses owned by landlords, rather than helping renters. These effects might all hurt the poor more than the rich. This book brings together the seminal economics literature that studies whether these fears are valid and whether anything can be done about them.

Railway Age The Urban Insitute especially in high-poverty Urban school reformers for decades have tried to improve educational outcomes for underserved and disadvantaged students, with the assistance of constantly evolving federal and state policies. In recent years, education policies have shifted from targeting individual students to developing universal standards for teaching and learning, and comprehensive school reform (CSR) has emerged as an effective key model. The federal CSR program seeks to support the implementation of comprehensive school reform,

schools, and to improve efforts to help all children meet challenging academic standards. Schools that receive federal CSR funds must adopt approaches that comply with the No Child Left Behind Act (NCLB). This book provides a series of studies and reflections on CSR by leading experts in the field.

Boys' Life Springer Nature This book is a useful "how to" book for researchers and government offices wanting to start or improve their own QOL survey, and contains "best practices" from all over the world. It is a valuable resource

for researchers, policy and for those wishing to effect changes in public policy.

Working and Living Conditions in Canada

The book is an outstanding compilation. It is easy to use, the information is clear and well-presented, and the volume is smart and robustly crafted. . . The book is an important reference source for practitioners in international business, entrepreneurs and Asian studies. Bob Duckett, Reference Reviews

The current compilation fills the need for a Who's Who in the Chinese business world. . . This is a useful reference for scholars and students in China studies and for business practitioners.

Recommended. K.T. Wei, Choice

As direct foreign investment, both inward and outward, continues to gather momentum, the need to understand the leaders of Chinese corporations is increasingly important. The Biographical Dictionary of New Chinese Entrepreneurs and Business Leaders is therefore a welcome addition to corporate and academic libraries. The encyclopedia provides up-to-date coverage of the major players in China's new economy. Dorothy Mays, Chinese Librarianship

A long awaited reference volume! Professionally compiled and user-friendly. A must for the serious researcher. Leo-Paul Dana, Journal of Enterprising

Communities Biographical information about business leaders and entrepreneurs in China is scattered in a variety of Chinese sources such as books, newspapers, journal articles, web pages, etc. and are difficult to locate, especially from outside of China. This biographical dictionary, written in English, which includes some 200 of the most important movers and shakers of the new Chinese economy since 1978, is a very useful reference tool for libraries of all types as well as for anyone who is interested in learning and understanding the growing influence of China as a new economic power in the world. Hwa-Wei Lee, formerly of the

Library of Congress, and Ohio University Libraries This impressive effort by two leading scholars of Chinese business and society will quickly become a reference for all students and practitioners. Indeed, it is a ready vade mecum, filling the crying gap many experts have identified in recent years. This work will set the standard for its successors: independent in its analytical assessments, broad-spectrum in its choice of entry, far-sighted in its selections. John R. McIntyre, Georgia Institute of Technology, US The book is a must-have for any student, library, executive or entrepreneur contemplating the business environment in China. In an important society where clout

is paramount and relationship is key, the book's listing of Who's Who in China is essential to success. An essential read for anyone thinking of doing business in China! J. Mark Munoz, Munoz and Associates International and author of *A Salesman in Asia* For anyone interested in interacting with China, whether doing business or not, it would be advantageous to know thy foe and thyself, as Sunzi (Sun Tzu) put it. And this work will definitely be conducive to your gaining an insight on contemporary China and its economic boom. It can be used as a reference tool or read as a textbook. Highly recommended for college and public libraries. Shixing Wen, Editor-in-Chief,

Chinese Librarianship, Former President, Chinese American Librarians Association and Councilor, American Library Association This exhaustive resource provides comprehensive coverage of the major players in the Chinese economy since the reform era, which began in 1978. It includes 200 entries briefly summarizing each individual's life and career, with a central focus on his or her accomplishments and the key roles played in the economic development of China. The emphasis of the book is on the movers and shakers of China's new economy, highlighting notable figures from both the initial economic liberalization period and the renewed growth

from the early 1990s to the present within the past 25 years with time. This invaluable dictionary is the result of collaborative efforts across the globe. Over forty scholars from the United States, mainland China and Taiwan, United Kingdom, Germany, F

The Timberman

The 22q11.2 deletion syndrome, also known as velo-cardio-facial syndrome and DiGeorge syndrome, is relatively new. The genetic test to determine if a child has it has only been available since 1994. *Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition*, effectively blends the thoughtful research that has transpired

practical and current educational strategies to better meet the needs of children with the 22q11.2 deletion syndrome and other developmental disabilities. With its expanded content, as well as new contributions from some of the most highly regarded experts in the field, *Educating Children with Velo-Cardio-Facial Syndrome, 22q11.2 Deletion Syndrome, and DiGeorge Syndrome, Third Edition* is an essential resource for teachers, parents, physicians, and therapists of children with this complicated learning profile. To first address the scientific information that is needed to understand the syndrome and the implications of

current research, expert contributors present the results of current studies involving brain abnormalities, language/learning profiles, medical needs, and psychiatric and behavioral difficulties. These valuable chapters are written in a reader-friendly manner to help parents, professionals, and teachers gain useful and necessary comprehension of the unique characteristics of the 22q11.2DS population. The second part of the book is a practical guide to educating a child with 22q11.2DS from birth through adulthood. Divided into the various stages of development from preschool to adulthood, it includes information regarding the necessary tests

special education teams should run, typical difficulties associated with learning, changes that occur with ability as the child matures, and behavioral problems in the school setting. New to the Third Edition: * Addition of recent research studies since 2012 * Current research and treatment options for mental health issues * Expanded and enhanced coverage of bullying and the social/emotional aspects of the syndrome * Discussion on the possibility of cognitive decline and how to address this at school * More information on Common Core State Standards and standardized testing for children with disabilities, including a section on understanding test

scores * Homeschooling and other placement alternatives * Executive functioning deficits, their impact in the classroom, and approaches to use * Dealing with problem behaviors such as withdrawal and school refusal * Cognitive remediation and new treatment strategies * New math and reading remediation techniques * New options for programming and post-secondary placements
