System administration is about the design, running and maintenance of human-computer systems. Examples of human-computer systems include business enterprises, service institutions and any extensive machinery that is operated by, or interacts with human beings. System administration is often thought of as the technological side of a system: the architecture, construction and optimization of the collaborating parts, but it also occasionally touches on softer factors such as user assistance (help desks), ethical considerations in deploying a system, and the larger implications of its design for others who come into contact with it. This book summarizes the state of research and practice in this emerging field of network and system

administration, in an anthology of chapters written by the top academics in the field. The authors include members of the IST-EMANICS Network of Excellence in Network Management. This book will be a valuable reference work for researchers and senior system managers wanting to understand the essentials of system administration, whether in practical application of a data center or in the design of new systems and data centers. - Covers data center planning and design - Discusses configuration management - Illustrates business modeling and system administration - Provides the latest theoretical developments

Today's managers are increasingly expected to successfully oversee and understand information systems -- even when it is an area in which they have had little formal training or expertise. INFORMATION TECHNOLOGY FOR MANAGERS is targeted at these future managers who are expected to understand the business implications of information technology. Real world examples show future managers how information technology can be applied to improve their organization. INFORMATION TECHNOLOGY FOR MANAGERS provides a framework for managers to understand their important role vis-a-vis information technology and it emphasizes the importance of working effectively with all members of the organization to achieve results.
