Now it's been completely revised and updated in a new fourth edition—non-doctrinaire, informative, and friendly, it is the most accessible and authoritative book, as much required reading for expecting and new mothers as a pregnancy guide and baby name book. All healthy mothers should consider breastfeeding for the first year of a baby's life, according to the American Academy of

Pediatrics, and this is the book that will help women give their babies the healthiest start possible. Written by Sally Wendkos Olds and a new co-author, Laura Marks, M.D., *The Complete Book of Breastfeeding, Fourth Edition* offers a comprehensive introduction to breastfeeding—how to get ready before the baby arrives; how to involve fathers and siblings; and the best diet and foods for mom. There are sections on dealing with problems at the hospital; extensive information on exclusive pumping (EPing); the best systems for giving supplementary bottles to a breastfed baby; the safest sleep scenarios for babies; breastfeeding in public, including laws affecting breastfeeding mothers. New data about preterm infants is presented, and special situations—multiples, breast cancer, overweight and large-breasted women, breast surgery, tattoos and piercings—are also discussed in detail. An expanded chapter on weaning features sections on breastfeeding past infancy. Also new is an appendix of online resources.
