"The risk of engine failure is greatest when your engine is young, NOT when it's old. You should worry more about pediatrics than geriatrics." -Mike Busch  
A&P/IA Mike Busch on Engines expands the iconoclastic philosophy of his groundbreaking first book Manifesto to the design, operation, condition monitoring, maintenance and troubleshooting of piston aircraft engines. Busch begins with the history and theory of four-stroke spark-ignition engines. He describes the construction of both the "top end" (cylinders) and "bottom end" (inside the case), and functioning of key systems (lubrication, ignition, carburetion, fuel injection, turbocharging). He reviews modern engine leaning technique (which your POH probably has all wrong), and provides a detailed blueprint for maximizing the life of your engine. The second half presents a 21st-century approach to health assessment, maintenance, overhaul and troubleshooting. Busch explains how modern condition monitoring tools-like borescopy, oil analysis and digital engine monitor data analysis-allow you to extend engine life and overhaul strictly on-condition rather than an arbitrary TBO. The section devoted to troubleshooting problems like rough running, high oil consumption, temperamental ignition and turbocharging issues is worth its weight in gold. If you want your engine to live long and prosper, you need this book.

Major changes in gas turbine design, especially in the design and complexity of engine control systems, have led to the need for an up to date, systems-oriented treatment of gas turbine propulsion. Pulling together all of the systems and subsystems associated with gas turbine engines in aircraft and marine applications, Gas Turbine Propulsion Systems discusses the latest developments in the field. Chapters include aircraft engine systems functional overview, marine propulsion systems, fuel control and power management systems, engine lubrication and scavenging systems, nacelle and ancillary systems, engine certification, unique engine systems and future developments in gas turbine propulsion systems. The authors also present examples of specific engines and applications. Written from a wholly practical perspective by two authors with long careers in the gas turbine & fuel systems industries, Gas Turbine Propulsion Systems provides an excellent resource for project and program managers in the gas turbine engine community, the aircraft OEM community, and tier 1 equipment suppliers in Europe and the United States. It also offers a useful reference for students and researchers in aerospace engineering.

When he became a commercial pilot at age nineteen, Bill Grenier never imagined that one day he'd be captain of the largest commercial plane the world had seen, flying the highest profile routes of a proud national carrier. Even less could he have imagined, at age nineteen and with barely a penny to his name, that he'd one day be a wealthy man. But he would ultimately control an empire worth nearly a billion dollars. With liberal doses of wit and humour, Miles to Millions shows what a little luck, lots of perseverance, and an appetite for adventure can do. From boarding house to boardroom, from cradle to cockpit, Grenier offers a fascinating story of success both as a commercial pilot and as a businessman. Filled with anecdotes you'd never expect from a single career from acting as repo man taking planes for payment to saving hundreds of passengers in a stricken 747 with a collapsed co-pilot Miles to Millions is a high-flier of a story bound to entertain both aviation experts and enthusiasts alike.

Please note: This ebook edition does not include the photo insert from the print edition. The widely anticipated memoir of legendary ace American fighter pilot, Robin Olds Robin Olds was a larger-than-life hero with a towering personality. A graduate of West Point and an inductee in the National College Football Hall of Fame for his All-American performance for Army, Olds was one of the toughest college football players at the time. In WWII, Olds quickly became a top fighter pilot and squadron commander by the age of 22—and an ace with 12 aerial victories. But it was in Vietnam where the man became a legend. He arrived in 1966 to find a dejected group of pilots and motivated them by placing himself on the flight schedule under officers junior to himself, then challenging them to train him properly because he would soon be leading them. Proving he wasn't a WWII retread, he led the wing with aggressiveness, scoring another four confirmed kills, becoming a rare triple ace. Olds (who retired a brigadier general and died in 2007) was a unique individual whose personal story is one of the most eagerly anticipated military books of the year.

This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. It is the only biographical directory of its kind and includes contact, affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations. The biographical directory is in alphabetical order by individual name. After each individual name, current affiliation and contact information is provided. This includes job title, full name of affiliation (e.g., business, university, association, research institute), business address, and electronic contacts-telephone, fax, e-mail and Web site. Home addresses and contacts are also provided for most of the entries. In the biographical summary section for each individual, the following information is provided: date and place of birth, education and educational achievements, work experience including company or other organization names, positions held and time periods. Also included in this section are the number of patents awarded, articles, and book chapters authored, and conference sessions chaired. Other information includes titles of books edited or written by the individual, listing of conferences where the person had a leadership position, and listing of memberships and positions held in professional organizations. Finally, professional and civic awards are listed. Indexes provide listings of individuals by company or other organization name, and also by geographical location. Who's Who in Plastics & Polymers is now published in a limited edition of 1,000 copies. This edition will not be reprinted. To be sure of receiving your copy, please act now. Information on ordering follows sample pages on the reverse.

We have all heard stories of web cam models making hundreds of thousands of dollars, but what are opportunities are there for technically minded guys (and girls) who would prefer to be managers than performers? Running a professional studio requires a great deal of expertise but is ideally suited to somebody with a background in computing. No matter whether you are an acknowledged Stack Overflow expert or an anonymous coward that lurks among the Slashdot trolls, becoming a web cam studio owner is a great way to become your own boss. This book is a how-to guide on getting started before your current job is outsourced to Bangalore or replaced

completely by artificial intelligence algorithms. From selecting a location to recruiting models, this book will guide you through the process of setting up a fully functioning studio anywhere in the world. It explains all the equipment that you will need to get started as well as how to train your models and get the very best out of each one. There is a full chapter on the increasingly complex areas of model marketing and branding, as well as a very detailed look at the vast potential of off-line profits, ranging from custom videos and personalised picture sets to fetish exotica, such 'burusera' underwear sales and intimately flavoured pussy pops. The demand for model related products will certainly make your eyes pop. It also takes an indepth look at subjects such as teledildonics and virtual reality. This book is unique in that it even anticipates the death of the camgirl, explaining how they are quickly being replaced by AI-powered, digital chatbots. The author uses his own wide ranging experience and unique perspective to reveal one of the most profitable new industries of the new millennium.

Robert Graysmith reveals the true identity of Zodiac—America's most elusive serial killer. Between December 1968 and October 1969 a hooded serial killer called Zodiac terrorized San Francisco. Claiming responsibility for thirty-seven murders, he manipulated the media with warnings, dares, and bizarre cryptograms that baffled FBI code-breakers. Then as suddenly as the murders began, Zodiac disappeared into the Bay Area fog. After painstaking investigation and more than thirty years of research, Robert Graysmith finally exposes Zodiac's true identity. With overwhelming evidence he reveals the twisted private life that led to the crimes, and provides startling theories as to why they stopped. America's greatest unsolved mystery has finally been solved. INCLUDES PHOTOS AND A COMPLETE REPRODUCTION OF ZODIAC'S LETTERS
