How to Rebuild and Modify Penguin

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

Exploring the Tomato engages with an apparently simple fruit in order to reveal major changes to society and economy. It treats the tomato as an object of fascination and as a probe into major historical changes in twentieth century capitalism. From first domestication to genetic modification, from Aztec salsa to supermarket pizza, the tomato has been continually transformed in the ways it has been produced, exchanged and consumed. This book explores what brings about a variety that is at once biological, historical and socio-economic. A conceptual framework of 'instituted economic process' demonstrates how different tomato forms are an expression of dynamic processes in capitalist economies and societies during the twentieth century. As both an early pioneer in mass production and a contemporary contributor to the creation of global cuisines, the tomato has been subject to intense innovation. Computerised total ecologies under glass, producing fresh tomatoes of all shapes, colours and sizes, compete with sun and southern climates across the world. To enter the variety of tomato worlds is to discover the variety of capitalism. Written in an accessible style, this book makes a major contribution to the emerging field of economic sociology and to our understanding of the innovation process. It should be read by anyone concerned with social science, particularly economists and sociologists, as well as those interested in food and the history of food.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
