AQA GCSE (9-1) Biology Student Book Letts and Lonsdale

Three sets of ocean liners, each destined to be of three vessels, dominated the Atlantic in the Edwardian era. The race to build the biggest and the best began with Mauretania and Lusitania in 1906, followed by the White Star Line's Olympic and Titanic in 1911-12. Each of these pairs was to see a larger sister, developed as a result of changes needed or desired as a result of operating the two earlier vessels, with Cunard's being Aquitania and White Star's, the ill-fated Britannic. Germany's answer to these British behemoths was the Albert-Ballin designed trio of Imperator, Vaterland and Bismarck. Through misfortune or war, two of these vessels would sink but the others led useful lives, with Aquitania surviving two world wars before being scrapped. Designed to be the absolute engineering achievements of their time, these nine vessels dominated the Atlantic. J. Kent Layton tells the story of the Edwardian Superliners in this fabulously illustrated volume, showcasing many images previously unpublished and never before seen. Rarely can one describe a book as definitive, but this volume truly deserves the accolade.

Each specification topic has been referenced and distilled into the key points to make in an examination for top marks. Questions on all topics assessing knowledge, application and analysis are all specifically and carefully devised throughout

this book.

GCSE Biology GCSE Biology For AQA (Grade 9-1) Exam Merger: GCSE Biology Past Papers OCR

Never has there been a more crucial time to improve middle leadership. For many years school inspections have focused on data-driven outcomes and the role of senior leaders in driving school improvement; recently, however, the focus has shifted to curriculum and middle leadership. This has left middle leaders under increased pressure to be able to justify their actions and decisions. Instead of relying on generic leadership theories, *Middle Leadership Mastery* collates perspectives from psychology, sociology, cognitive science and Silicon Valley CEOs to share evidence-informed guidance on a wide range of topics - from designing a curriculum and quality assuring teaching to supporting staff and students in crisis and managing well-being. Adam Robbins draws on his 16 years' experience of teaching in a deprived area to illustrate his points with stories and anecdotes from the front line, demonstrating how middle leaders can better understand their context and deliver the best outcomes from a variety of starting points.

AQA GCSE (9-1) Combined Science Trilogy Student Book Nelson Thornes

Ten years ago, at the International Botanical Congress in Edinburgh, a group of us from various countries discussed the difficulty of pursuing academic problems in depth at such meetings. In particular, we were discouraged at the poverty of time for phloem transport. From long association, we were conscious of the extraordinary breadth of the problem, from developmental through anatomical, to biophysical and physiological. Only by a reasonable understanding of all these components could one hope to come to some kind of understanding. We decided to establish common plant material so that data would have a common source. Similarly, we resolved to exchange information by circulating pre-publication manuscripts. For awhile, after the meeting was a pleasant memory, the plan seemed to be working; but, as is so often the case, human infirmities and foibles played early and, subsequently, predominant roles. Some became administrators (a punishment for good behaviour); others concentrated on alternative rings in their academic circuses. The next Congress (in Seattle) proved similar to its predecessor in its neglect and, consequently, succor was sought elsewhere. A

little known, but remarkably understanding group becoming visible was the Science Committee and the Division of Scientific Affairs of N. A. T. O. Its sponsorship of Advanced Study Institutes including phytochemistry and phytophysics, was unusual both in the generosity of its funding and in the requirements for academic quality.
