Airplane Flying Handbook (FAA-H-8083-3A) Skyhorse Publishing Inc.

Captain John A. Mokatdier graduated and received his Bachelor's Degree from Embry-Riddle Aeronautical University in Daytona Beach, Florida. He has been flying for the past 35 years and currently holds both a Gold Seal Flight Instructor and Advanced Ground Instructor licenses from the FAA. Capt. Mokatdier has four type ratings which include: Airbus 330, Airbus 320, Boeing 747 and Boeing 727. He has logged over 24,000 hours flight time with the majority of his hours in jet transport and wide body aircraft. He has flown around the world. Captain Mokatdier served as a Boeing 727 Check Airman (TRE) and conducted rating rides, proficiency checks, instructions and simulator checks and line checks for over 10 years with a commercial airline in the United States. He has trained hundreds of pilots with no failures and well above average results. The pilots he has trained have lots of respect for Capt. Mokatdier's knowledge and his training style made them feel relaxed during the entire simulator session maximizing their learning due to his teaching ability, honesty and integrity. They have all commented that he is a true professional instructor and TRE. This is his second book that he has published. The first one was Boeing 727 Flight Master which received many outstanding and excellent reviews and positive feedback from the professionals in the airline industry who read the book and it soon became one of the best training books on a Boeing 727.

The Limits of Expertise Boeing 727 Study Guide Covering the 727-100 and 727-200 Versions

This is an illustrated technical guide to the Boeing 737 aircraft. Containing extensive explanatory notes, facts, tips and points of interest on all aspects of this hugely successful airliner and showing its technical evolution from its early design in the 1960s through to the latest advances in the MAX. The book provides detailed descriptions of systems, internal and external components, their locations and functions, together with pilots notes and technical specifications. It is illustrated with over 500 photographs, diagrams and schematics. Chris Brady has written this book after many years developing the highly successful and informative Boeing 737 Technical Site, known throughout the world by pilots, trainers and engineers as the most authoritative open source of information freely available about the 737.

McDonnell Douglas-Boeing MD-80 Study Guide, 2018 Edition Moody Publishers

On May 2, 1970, a DC-9 jet with 57 passengers and a crew of six departed from New York's JFK International Airport en route to the tropical island of St. Maarten, but four hours and 34 minutes later the flight ended in the shark-infested waters of the Caribbean. It was, and remains, the only open-water ditching of a commercial jet. The subsequent rescue of survivors took nearly three hours and involved the coast guard, navy, and marines. This gripping account of that fateful day recounts what was happening inside the cabin, the cockpit, and the helicopters as the crews struggled against the weather and dwindling daylight to rescue the survivors, who had only their life vests and a lone escape chute to keep them afloat.

Blob School is an educational resource designed specifically for one of the main purchasers of the Blobs - teachers! This practical resource aims to cover all the key areas of school life so that teachers, assistants, school workers, pupils and parents can reflect upon a wide range of contexts and issues which occur throughout the school year. The book includes 47 images which can be projected upon an Interactive White Board or photocopied for whole class or small group discussion. The Blobs The Blobs are simple. They deal with deep issues using the primary languages we learn from infancy - feelings and body language. This is why they are used with children as young as 4, all the way through to the elderly. Without words, the Blobs can be interpreted in a hundred different ways. There is no right and wrong about the Blobs, which is very important. A leader who uses them in a 'one way of reading them only way' will find that the rest of their group become very frustrated in discussions. Each picture is a means to a conversation, rather than a problem to be solved or a message to be agreed upon.

In Life Takes Wings, Captain Lynn Rippelmeyer soars with inspiration from a starry-eyed farm girl gazing at the sky to flight attendant to first female pilot of the revolutionary Boeing 747. More than just a story of one woman's love affair with the skies, Life Takes Wings combines lessons in tenacity, humility, humor, perseverance, and partnership with the exhilaration of defying social norms, and the rewards of being true to oneself. Inspired to become a commercial airline pilot in an age when it was not an option for girls, serendipitous relationships lead Lynn to her first flying lessons in a seaplane, then to becoming flight instructor and charter pilot while also working as a flight attendant. Perceived as being incapable of flying, women were relegated to the cabin. Ignoring the pilots' negative comments, Lynn became a number of aviation's female firsts – member of first all-female

commercial airline crew, first flight attendant-to-pilot, and first female pilot of the Boeing 747. Through laughter and tears, Life Takes Wings shows the sky is no limit for those who follow their dreams.
