Proceedings of the First Symposium on Aviation Maintenance and Management collects selected papers from the conference of ISAMM 2013 in China held in Xi ' an on November 25-28, 2013. The book presents state-of-the-art studies on the aviation maintenance, test, fault diagnosis, and prognosis for the aircraft electronic and electrical systems. The selected works can help promote the development of the maintenance and test technology for the aircraft complex systems. Researchers and engineers in the fields of electrical engineering and aerospace engineering can benefit from the book. Many 21st century operations are characterised by teams of workers dealing with significant risks and complex technology, in competitive, commercially-driven environments. Informed managers in such sectors have realised the necessity of understanding the human dimension to their operations if they hope to improve production and safety performance. While organisational safety culture is a key determinant of workplace safety, it is also essential to focus on the non-technical skills of the system operators based at the 'sharp end' of the organisation. These skills are the cognitive and social skills required for efficient and safe operations, often termed Crew Resource Management (CRM) skills. In industries such as civil aviation, it has long been appreciated that the majority of accidents could have been prevented if better non-technical skills had been demonstrated by personnel operating and maintaining the system. As a result, the aviation industry has pioneered the development of CRM training. Many other organisations are now introducing non-technical skills training, most notably within the healthcare sector. Safety at the Sharp

End is a general guide to the theory and practice of non-technical skills for safety. It covers the identification, training and evaluation of non-technical skills and has been written for use by individuals who are studying or training these skills on CRM and other safety or human factors courses. The material is also suitable for undergraduate and post-experience students studying human factors or industrial safety programmes.

ASME Technical Papers CRC Press

This is an illustrated technical guide to the Boeing 737 aircraft. Containing extensive explanatory notes, facts, tips and points of interest on all aspects of this hugely successful airliner and showing its technical evolution from its early design in the 1960s through to the latest advances in the MAX. The book provides detailed descriptions of systems, internal and external components, their locations and functions, together with pilots notes and technical specifications. It is illustrated with over 500 photographs, diagrams and schematics. Chris Brady has written this book after many years developing the highly successful and informative Boeing 737 Technical Site, known throughout the world by pilots, trainers and engineers as the most authoritative open source of information freely available about the 737.

A Writer's Life Naval Inst Press

A Writer's Life: More Ups Than Downs is sure to attract large numbers of readers for its description of a career in the making and for the author's frankness in surmounting obstacles. Jim Shevis has had his ups and downs, there's no question of that. But he's always managed to get up one more time than he's fallen down. This is a seasoned journalist who traveled to Russia and Kazakhstan with former Vice President Gore, chinned with Norman Schwarzkopf, written speeches for Geraldine Ferraro, and covered Washington's power centers, including Congress, the Pentagon and, on occasion, the White House. Along the way, Shevis pursued a fascinating hobby - collecting autographs of some 100 newsmakers and celebrities he's met or written about. The collection includes the signatures of John F. Kennedy, Robert Frost, John Kenneth Galbraith, Martin Luther King, Jr., and Colin Powell, among others. While he has had an exciting career, the author has had some dark moments in life too - many brought on by his father's drinking as well as his own. A Writer's Life is a light, easy-to-read, topical work written in the lean style of a journalist.
