## Mirages of the Mind World Scientific

In this riveting novel, beloved international bestselling author Deepak Chopra captures the spellbinding life story of the great and often misunderstood Prophet. Islam was born in a cradle of tribal turmoil, and the arrival of one God who vanquished hundreds of ancient Arabian gods changed the world forever. God reached down into the life of Muhammad, a settled husband and father, and spoke through him. Muhammad's divine and dangerous task was to convince his people to renounce their ancestral idols and superstitious veneration of multiple gods. From the first encounter, God did not leave Muhammad alone, his life

was no longer his own, and with each revelation the creation of a new way of life formed and a religion was born. Muhammad didn't see himself as the son of God or as one who achieved cosmic enlightenment. His relatives and neighbors didn't part the way when he walked down the parched dirt streets of Mecca. There was no mark of divinity. Orphaned by age six, Muhammad grew up surrounded by dozens of cousins and extended family to become a trusted merchant. Muhammad saw himself as an ordinary man and that is why what happened to him is so extraordinary. Rooted in historical detail, Muhammad brings the Prophet to life through the eyes of those around him. A Christian hermit

---

mystic foretells a special destiny, a pugnacious Bedouin wet nurse raises him in the desert, and a religious rebel in Mecca secretly takes the young orphan under his spiritual wing. Each voice, each chapter brings Muhammad and the creation of Islam into a new light. The angel Gabriel demands Muhammad to recite, the first convert risks his life to protect his newfound faith, and Muhammad's life is not a myth but an incredible true and surprisingly unknown story of a man and a moment that sparked a worldwide transformation.

*Maut Ke Saudagar* Leo Cooper Books  
EIGHTEEN FIFTY-SEVEN was an epic confrontation of race and politics between the colonial new western secular-positivism now in alliance with western Christianity, and the indigenous new, the forces of peasant-aristocratic Asian capitalism and modernity. Till today it remains the only event, which gives a glimpse of lost possibilities of a non-Western, free, unfettered Asiatic personality and development. It outlines in detail the machinations and mindset

---

of liberal western Imperialism, so easily lured into secular Imperialism and then into religious fundamentalism, its promise of liberty turning into a nightmare of oppression and cruelty. Accessible to scholars, historians, lay readers, students of military adventure and battles, ideologies, action and drama, the story of 1857 story resonates with smells and sounds of an Indian caravanserai and chandukhana, the auburn-gray picture of high sounding, sex starved Victorian England. It offers for the first time an East-West conflict with equal footage offered to both sides seen from a contemporary perspective Asian and Western, indigenous and modern revolving around the

heterogeneous needs and aspirations of the present, strife ridden age. T The book in two volumes, showcases a West, the West has never seen, an Asia which Asians are unaware of and a story of `The Indian Mutiny which has never been told before. The whole Asia-Europe conflict gets a new slant. In the current world, political climate of East-West polarization, this book is bound to do well both in India, Asia and the West. *Mind of a Survivor* Macmillan Children's Books

The Nobel Prize-winning author gives us – on the basis of his own intensive seventeen month journey across the Asian continent – an unprecedented revelation of the Islamic world. • “A brilliant report.... A book of scathing inquiry and judgment, whose tragic power is being continually reinforced by current events” (Newsweek). With all the narrative power and intellectual authority that have distinguished his

earlier books and won him international acclaim (“There can hardly be a writer alive who surpasses him” – Irving Howe, The New York Times Book Review), Naipaul explores the life, the culture, the ferment inside the nations of Islam – in a book that combines the fascinations of the great works of travel literature with the insights of a uniquely sharp, original, and idiosyncratic political mind. He takes us into four countries in the throes of “Islamization” – countries that, in their ardor to build new societies based entirely on the fundamental laws of Islam, have violently rejected the “materialism” of the technologically advanced nations that have long supported them. He brings us close to

the people of Islam – how they live and work, the role of faith in their lives, how they see their place in the modern world. *The Future of Pakistan* Verso Books

Though much of Iqbal's best poetry is written in Persian, he is also a poet of colossal stature in Urdu. Shikwa (1909) and Jawab-i-Shikwa (1913) extol the legacy of Islam and its civilising role in history, bemoan the fate of Muslims

---

everywhere, and squarely confront the dilemmas of Islam in modern times. Shikwa is thus, in the form of a complaint to Allah for having let down the Muslims and Jawab-i-Shikwa is Allah's reply to the poet's complaint.

One of science's great unsung heroes, Nikola Tesla (1856-1943) was a prophet of the electronic age. His research laid much of the groundwork for modern electrical and communication systems, and his impressive accomplishments include development of the alternating-current electrical system, radio, the Tesla coil transformer, wireless transmission, and fluorescent lighting. Yet his name and work are only dimly recognized today: Tesla's research was so groundbreaking that many of his contemporaries failed to understand it, and other scientists are unjustly credited for his

innovations. The visionary scientist speaks for himself in this volume, originally published in 1919 as a six-part series in *Electrical Experimenter* magazine. Tesla recounts his boyhood in Croatia, his schooling and work in Europe, his collaboration with Thomas Edison, and his subsequent research. This edition includes the essay "The Problem of Increasing Human Energy: With Special Reference to the Harnessing of the Sun's Energy," which anticipates latter-day advances in environmental technology. Written with wit and lan, this memoir offers fascinating insights into one of the great minds of modern science.
