This book includes numerous calculations for the many specific examples included within. I have included the many calculated examples to provide the reader with immediate justifications for the numerous concepts described. This was not done to belittle or talk

down to the reader but rather to give the reader a clear sense of the plausibility for the propulsion methods and performance capabilities thereof. Interstellar travel at the many specific highly relativistic velocities contemplated in this bookand, in some cases, extreme vehicle masses is still a very controversial subject but nonetheless a highly mathematicalized and intelligible subject. My hope and intention is to thus clearly inspire and show the reader the plausibility of the concepts by providing the reader with proper evidence through his or her simple inspection of the formulas and values included in the computations. Some speculative physics is included, which is based on commonly presented theoretical constructs.

Under Pressure by Lori Foster Leese Phelps ' s road hasn ' t been an easy one, but it ' s brought him to the perfect job—working for the elite Body Armor security agency. And what his newest assignment lacks in size, she makes up for in fire and backbone. But being drawn to Catalina Nicholson is a dangerous complication. Originally published in 2017. Can ' t Let Go by Gena Showalter Ryanne Wade has sworn off men. Then Jude Laurent walks into her bar, and all bets are off. The former army ranger has suffered unimaginably, first being maimed in battle then losing his wife and daughters to a drunk driver. Making the brooding widower smile is priority one. Resisting him? Impossible. Originally published in 2017. Seized by Seduction by Brenda Jackson From the moment his eyes meet hers across the crime-scene tape, ex-con turned bodyguard Quasar Patterson knows he has to see the mysterious Dr. Randi Fuller again. She ' s a renowned psychic investigator who can foresee danger for others, but not for herself. That makes Quasar doubly determined to watch over her—the closer, the better—as she ' s drawn into a dangerous gang rivalry. Originally published in 2017.

The World Wide Web and Contemporary Cultural Theory HQN Books

Three classic, must-read novels from New York Times bestselling author Brenda Jackson ' s The Protectors series, collected here in one volume for the first time! Forged in Desire When good girl Margo Connelly becomes Lamar " Striker " Jennings ' s latest assignment, she knows she ' s in trouble. And not just because he ' s been hired to protect her from an underworld criminal. The reformed bad boy ' s appeal is breaching all her defenses, and as the threats against her increase, Margo isn ' t sure which is more dangerous: the gangster targeting her, or the far too alluring protector tempting her to let loose. Though Striker ' s now living on the right side of the law, he ' s convinced his troubled past keeps Margo out of his league. But physical chemistry explodes into full-

blown passion when they go on the run together. Surrendering to desire could be a deadly distraction—or finally prove that he's the only man qualified to keep her safe, and win her love. Seized by Seduction From the moment his eyes meet hers across the crime-scene tape, ex-con turned bodyguard Quasar Patterson knows he has to see the mysterious Dr. Randi Fuller again. She's a renowned psychic investigator who can foresee danger for others, but not for herself. That makes Quasar doubly determined to watch over her—the closer, the better—as she's drawn into a dangerous gang rivalry. Both her psychic gift and their blinding chemistry tell Randi that she and Quasar are fated to be entwined. Even as they surrender to the heat between them, there's no guarantee of a happily-ever-after now that an enemy has her in his sights. And claiming a future will take more than Quasar's strength and skill. If he can't risk the heart he's always held in check, they'll both lose for good... Locked in Temptation Police detective Joy Ingram's connection to elite security expert Stonewall Courson is instant. Undeniable. Electric. But her commitment to protect and serve has always come first. Everything else is secondary—especially when she uncovers an underground surrogate baby-making ring. Joy can't risk a distraction during the most important case of her career, not even one as sexy as reformed ex-con Stonewall. There are few things Stonewall values more than a strong woman. But when Joy's investigation draws her into a deadly conspiracy that goes deeper than she ever imagined, he must convince her that he's the best man to protect her. And while he puts his life on the line to save hers, the insatiable attraction between them becomes the one danger neither of them can escape. Titles originally published in 2017

Fitface: Hands Free Facial Toning Exercises Acorn Publishing Co. Ltd.

Obvious face-lifts and Botox overload are no longer in vogue, but a new generation of fillers, laser treatments, and topical preparations are keeping millions looking younger—and more natural—for decades longer. Prominent dermatologist and cosmetic surgeon Dr. Neil Sadick explains how every woman, at any age, can have beautiful, healthy skin without a scalpel or surgery. Starting off with the basics of skin care we all need in our early adult, damage-prevention years, Sadick cites the most efficacious cosmetic products and discusses the best practices for preserving a glowing, youthful appearance. For older readers looking to maintain healthy skin and reverse damage, he explains the various nonsurgical options available: from the modern day miracle of cell therapy to cosmeceuticals, fillers, and treatments for cellulite and hair loss. Throughout he mentions brand-name products at every price point and treatments for every budget. User-friendly and backed by the latest science and technology, *The New Natural* is every adult's guide to the most advanced antiaging protocol for achieving young, vibrant skin—now and in the future.

When Beka Valentine's ne'er-do-well brother Rafe limps onto the Andromeda Ascendant in a stolen junker with a sputtering Slipstream drive, Beka can't turn him away, because he claims to have found the mother they never knew. Unfortunately,

right now the Andromeda is the linchpin in a precarious negotiation between the Drago-Kazov Pride and the Human Interplanetary Alliance, which seeks to free Earth and other old-school planets from the Nietzschean yoke. But the HIA may also be allied with the pure-human-supremacist Knights of Genetic Purity, who, in their evangelical fervor, have become every bit as fanatical as the genetically engineered devil they oppose. If the HIA allies with the Genites, the Milky Way will see yet another Human-Nietzschean bloodbath. Captain Dylan Hunt has survived one already and will do just about anything to prevent another such debacle. Dylan can't count on Seamus Harper, the only unmodified human in his crew, who is naïvely susceptible to the appeal of the Genite cause. He needs every level-headed crewmate he's got, and Beka, for all her emotional Sturm und Drang, is the best pilot in three galaxies. But Beka can't resist the chance—however remote—to find her long-lost mother. Years before, Magdalena Valentine went on a quest . . . the same one Beka has made her own. A quest to find the advanced technology of the lost Vedran race. A technology so powerful it lets the Vedrans hide their solar system in the fabric of the Slipstream itself; so powerful it could destroy the universe as we know it. This quest is where it all must lead—where, if you ask a certain purple alien, it was always, inevitably, destined to lead. Now only Dylan Hunt can stop Beka Valentine from activating the Vedran device. And he may have to kill her to do it. That is, if Tyr Anasazi doesn't kill him first. Or the Knights of Genetic Purity. Or the Human Interstellar Alliance . . . led by one Seamus Harper. The fate of the universe hinges on what Dylan Hunt and his crew do next! Still unsolved, still baffling, still claiming new victims. Here are the untold stories. A pilot reports a strange haze enveloping his plane, then disappears; eleven hours after fuel starvation, as if calling from a void, he is heard 600 miles away. He requests permission to land, then vanishes forever. A freighter steaming over placid seas disappears without a trace. A pleasure yacht ghosts past without a soul on board. A pilot calls for help because a "weird object" is harassing his plane. A jet collides with an "unknown" and is never found. . . . Into the Bermuda Triangle is the first comprehensive examination of these baffling

disappearances in more than a generation. Drawing on official reports from the NTSB and other investigative agencies as well as interviews with scientists, theorists, and survivors, leading authority Gian Quasar not only sets the record straight on previously examined cases, he also offers a bulging file of new cases, the collective results of his twelve-year investigation. In meticulous detail this unflinching account: Documents confirmed disappearances of airplanes and ships Gathers new testimony and reexamines old interviews from eyewitnesses and survivors Explores possible explanations ranging from zero-point energy to magnetic vortices Challenges our assumptions with the sheer weight of accumulated evidence In this age of technological and scientific discovery, there are still mysteries that transcend understanding. The Bermuda Triangle is one. "The best book I've ever read on this important subject."—Andrew Griffin, *The Town Talk*

The Cosmos is merging at a stellar speed; constantly expanding and evolving, are we here, and no one else; are there forces at work we know nothing about? Humanity, has been surrounded by a radiant celestial, ecological, physiological and psychological, emersion into a final flawless reality. Life on Earth has been of the most profound society to evolve into universal wisdom, with perfect consciousness as the cosmos and the hereafter merge into our dimension. Humanity...just a decade after an era of a psychic awakening that rocked our axis, and has created a "Concrete Paradise" a civilization on one planet in complete unison, once again, we are on the threshold of yet another consciousness. We are not at all who we think we are. It is in the middle of fall in the picturesque utopia in what had been known as the east coast of the United States. The world is in a complete state of equanimity, the cycle of life goes on.

Call of the Cosmic Wild. Relativistic Rockets for the New Millennium. Bloomsbury Publishing USA

A comprehensive and practical overview In the last two decades, there has been a virtual explosion in the use of lasers in medicine, especially in the field of cosmetic dermatology. In fact, many of the clinical conditions presented today are solely treated by lasers. When discussing the term lasers', many different types of lasers and other similar energy-based devices have to be considered. Physicians who look upon this vast field often find themselves facing an extremely complex physics-based area of medicine with a veritable jungle of different devices on offer. This book provides a structured and comprehensive overview of the physical knowledge required to understand laser medicine and surgery. Moreover, the various clinical indications and treatments are clearly laid out and discussed. The authors, all experts in their field, have provided concise and topical chapters, which have purposely been kept generic when talking about the various lasers in order to increase the longevity of this volume.

A friendly, hands-on training manual and reference for lighting technicians in motion picture and television production, this handbook is the most comprehensive guide to set lighting available. It provides a unique combination of practical detail with a big-picture understanding of lighting, technology, safety, and professionalism, essential to anyone doing motion picture lighting. The fifth edition delves into every aspect of lighting and features vastly expanded sections on controlling LED lights, color science, lighting control systems, wireless systems, Ethernet-based control systems, battery power, and modern set protocol for productions small and large. With a generous number of original images, the book illustrates the use of soft light, the effect of lighting angles, and how the gaffer and DP build an effective lighting plan around the blocking of the actors. This encyclopedic volume of technical knowhow is tempered with years of practical experience and a much-needed sense of humor. This is the ideal text for professional lighting technicians across film and television including lighting directors, gaffers, DOPs, and rigging crews, as well as film and television production students studying lighting, camera techniques, film production, and cinematography. It includes a revamped companion website with supplementary resources, forms, checklists, and images.

Who ever heard of a vampire trying to put the bite on another? Or, of a lady vampire that flies around on a sponge mop drunk on blood pudding? Or, of the burgess of Telgh popping up like a piece of hot toast when a baby quasar pokes him with a finger. Sound crazy? Read on. You may never laugh so hard or feel so deeply as you experience the 'Curious Magic & Strange Events' characters endear or alienate themselves to you. Meet Jimi Hendrix Kolve. Following a near death experience he develops the ability to fly in his astral body. During his spare time he teaches the members of a bicycle club called Mel's Angels how to fly in theirs. Then, on what he thinks is a nowhere day, he rescues Krislyn Ann LaFuria, a strong willed twenty-year-old woman from kidnappers. They develop a close relationship. Together with three dogs, Sampson, Wagger and a dachshund, Elvis Pretzel, they befriend an inter-galactic wizard, Trissmaggis or Maggis as he prefers to be called. Soon after a tyrannosaurus-rex intergalactic wizard, Dregyon, a baby quasar, Existor, and the Burgess of Telgh join the small band. Meanwhile a vampire, Sinasted Castele, along with the once good turned bad head of the inter-galactic wizard's council, Luten Greck and his evil mentor Hithus are determined to make Earth the feeding grounds of Sinasted and his 'vamps' as he calls his followers. They intend to accomplish their goal by using the powers of enchanted bloodstones against all foes. Will Jimi and his group be able to counter the bloodstones and turn back Hithus and his evildoers?
