had shared his experience. *Back From the Brink* is a collection of riveting stories told by individuals who either attempted suicide and failed-and then realized it was a bad choice-or individuals who have stepped back from that fatal choice and gone on to live satisfying lives filled with hope. This unique book gives a voice to a pervasive epidemic so many struggle to talk about. These are stories that need to be heard."-J.L. Craig, Ph.D., Clinical Psychologist "Who knows more about suicide than someone who has attempted it, or changed their mind at the last minute, and gone on to live a productive life? Chris F. "This landmark new book gives us an invaluable perspective on the Supreme Court in democracy's hour of maximum danger."-Jon Meacham

The gripping story of the year that transformed the Supreme Court into the court of Donald Trump and Amy Coney Barrett, from the Pulitzer Prize-winning law columnist for The New York Times

At the end of the Supreme Court's 2019-20 term, the center was holding. The predictions that the court would move irrevocably to the far right hadn't come to pass, as the justices released surprisingly moderate opinions in cases involving abortion rights, LGBTQ rights, and how local governments could respond to the pandemic, all shepherded by Chief Justice John Roberts. By the end of the 2020-21 term, much about the nation's highest court has

---

changed. The right-wing supermajority had completed its first term on the bench, cementing Donald Trump's legacy on American jurisprudence. This is the story of that term. From the death of Ruth Bader Ginsburg to the rise of Amy Coney Barrett, from the pandemic to the election, from the Trump campaign's legal challenges to the ongoing debate about the role of religion in American life, the Supreme Court has been at the center of many of the biggest events of the year. Throughout *Justice on the Brink*, legendary journalist Linda Greenhouse, who won a Pulitzer Prize for her Supreme Court coverage, gives us unique insight into a court under stress, providing the context and brilliant analysis readers of her work in *The New York Times* have come to expect. Ultimately, Greenhouse asks a fundamental question relevant to all Americans: Is this still John Roberts's Supreme Court, or does it now belong to Donald Trump?

a luxury apartment block is built in the shape of a giant iPod. In China, President Xi Jinping denounces the trend of constructing 'bizarre' new buildings in wacky shapes and colours. In Cincinnati, celebrity architect Zaha Hadid is paid millions to design a single 'iconic' structure - with the hope of single-handedly transforming the region's ailing fortunes. These incidents are all part of the same story: the rise of the age of spectacle. Over the last fifty years, there has been a revolution in how our cities operate. In *The Age of Spectacle*, Tom Dyckhoff tells the story of how architecture became obsessed with the flashy, the monumental and the ostentatious - and how we all have to live with the consequences. Exploring cityscapes from New York to Beijing, and from Bilbao to Portsmouth, Dyckhoff shows that we are not just witnessing a new kind of building: we are living through a fundamental transformation in how our urban spaces work. The corporate explosion of the last few decades has fundamentally shifted the relationship between architects, politicians and cities' inhabitants, fostering innovative new kinds of engineering and design, but also facilitating ill-conceived vanity projects and commercial power-grabs. Timely, passionate and bursting with new ideas, *The Age of Spectacle* is both an examination of how twenty-first century cities work, and a manifesto for a radically new kind of urbanism. Our cities, Dyckhoff shows, can thrive in the age of spectacle - but only if they engage us not just with dazzling structures, but by responding to the needs of the people who inhabit

them. 'Engaging . . . The "iconic" disorder, you may find it difficult building is the most obvious to take that first step toward architectural phenomenon of our age recovery. You aren't alone. The Escorts Group, one of India's most iconic business houses, has seen its fair share of major setbacks in its seventy-five-year history. Founded in 1944 in Lahore, Escorts was first a victim of Partition. In 1960, it set up its manufacturing base in Faridabad on the outskirts of Delhi, and over the years was associated with leading global players such as Ford, JCB and Yamaha. The Rajdoot bikes it produced were a rage in the 1980s. But the same decade also witnessed a hostile takeover bid by Lord Swraj Paul, one of the lowest points in the company's life. No crisis, though, compared with the downturn that followed the economic liberalization of 1991, with the group exiting several of its business. At one point, the financial crisis was so deep that power supply to its office was cut off for non-payment of bills. From then to now, Escorts has seen a remarkable turnaround, led by Rajan Nanda and his son Nikhil.

Back from the Brink is the story

of how Escorts was turned around -- the Canadian border. And murder gets thrown into the equation when sheriff Nicole Cobain is called to the lake to assist Border Patrol but finds their boat adrift and a dead man in the ice. When the police drag the lake looking for bodies, they recover a satchel containing money and drugs--a satchel marked with the Border Patrol seal. The evidence points to corrupt elements within the Border Patrol who are involved in the drug trade. Then, another murder victim turns up--the brother of Frank, a Border Patrol agent who's been trying to root out the bad agents. Nicole suspects that the two missing agents may have been responsible for the theft of the money and drugs, but when one of them is found dead from a single gunshot wound, the trail suddenly grows cold. As the bodies pile up, Nicole begins to feel that she's the only good guy on the scene--and on the brink of a terrible discovery that could shake the community to its core.

This book provides an analysis of the crisis and the struggle to find a solution, examining the key events and the resulting policy measures.

Imagine spending three and a half years in prison for causing the financial scandal of the century, being divorced by your wife and then, to cap it all, being diagnosed with cancer. In 1995, Nick Leeson's unchecked risk-taking caused the sensational collapse of Barings Bank. He was sentenced

His stress levels were immeasurable yet, against all odds, he survived. *Back From The Brink* tells Leeson's complete personal story, whilst in-depth conversations with top psychologist Ivan Tyrell show how the continual levels of high stress that affected Nick's mental and physical health can be related to us all, including - living with relationship and family problems - struggling with debt - striving to achieve status and success - coping with serious illness. Alistair Darling's long-awaited book will be one of the most reviewed, widely discussed, and saleable political memoirs of recent years. In the late summer of 2007, shares of Northern Rock went into free-fall, causing a run on the bank - the first in over 150 years. Northern Rock proved to be only the first. Twelve months later, as the world was engulfed in the worst banking crisis for more than a century, one of its largest banks, RBS, came within hours of collapse. *Back from the Brink* tells the gripping story of Alistair Darling's one thousand days in Number 11 Downing Street. As Chancellor, he had to avert the collapse of RBS hours before the cash machines would have ceased to function; at the eleventh hour, he stopped Barclays from acquiring Lehman Brothers in order to protect UK taxpayers; he used anti-terror legislation to stop Icelandic banks from withdrawing funds from Britain. From crisis talks in Washington, to dramatic meetings with the titans of international banking, to dealing with the massive political and economic fallout in the UK, Darling

places the reader in the rooms where the destinies of millions weighed heavily on the shoulders of a few. His book is also a candid account of life in the Downing Street pressure cooker and his relationship with Gordon Brown during the last years of New Labor. *Back From The Brink* is a vivid and immediate depiction of the British government's handling of an unprecedented global financial catastrophe. Alistair Darling's knowledge and understanding provide a unique perspective on the events that rocked international capitalism. It is also a vital historical document.

Paul McGrath is Ireland's best loved sportsman and also its least understood. An iconic football presence during a professional career stretching over 14 years, he played for his country in the European Championship finals of 1988 and the World Cup finals of 1990 and 1994. But, behind the implied glamour of life in the employ of great English clubs like Manchester United and Aston Villa, McGrath wrestled with a range of destructive emotions that made his success in the game little short of miraculous. That story has until now never been told. It is a story that runs from a hard, hidden childhood spent in Dublin's orphanages all the way to the pain of two marriage break-ups and the struggle to cope with life after

football. Quite apart from his all too public struggle with alcoholism, the story runs through the surreal highs and calamitous lows of a life lived habitually on the edge of chaos. It is not just a football story. It is an extraordinary human story that is certain to surprise with its candour. Here, for the first time, read about the father he never met; the mother whose love never died; the routine loneliness and ritual bullying endured by a black kid growing up behind closed doors in 1960s Dublin; the emotional breakdown suffered on leaving that institution; the recovery that - remarkably - brought him all the way to Old Trafford; the rollercoaster ride that followed. Here, the guilt, fear, self-loathing are all laid bare in a story fired with hope and determination for the future. It may well be the most candid sports book ever written.
