Reserachers have developed a reusable cotton face mask that can kill 99.9999 per cent of bacteria and viruses within an hour of exposure to sunlight, according to the study published in the journal ACS Applied Materials and Interfaces, news agency PTI reported. However, live bacteria and viruses on the surface of the mask could still be contagious.

## Viruses And Bacteria Guided Study Answers

New cloth mask kills 99.9 per cent bacteria, viruses in one hour of sunlight, says study The researchers from the University of California, Davis in the US developed a new cotton fabric that would release reactive oxygen species (ROS) when exposed to daylight, killing microbes attached to the fabric's surfaces while being washable, reusable and safe for the wearer.

## Viruses And Bacteria Guided Study Answers

*Gut bacteria: The surprising impact of viruses*

Viruses. Technically, viruses are not members of any domain of life. They are considered here because, like bacteria, they are microscopic and can cause human diseases. Viruses are acellular particles that lack the properties of living things but have the ability to replicate inside living cells. They have no energy metabolism, they do not grow, they produce no waste products, they do not respond to stimuli, and they do not reproduce independently.
