Streptococci. Streptococci are spherical bacteria that divide in parallel planes to produce chains. The bacteria are Gram positive, and certain species are aerobic, while others are anaerobic. On blood agar, certain species partly destroy the red blood cells and are said to be alpha hemolytic. Other species completely destroy the blood cells and are beta hemolytic. Bacteria - A Case Study Guide About The Life of Bacteria Grade 11 Biology Study Guide: HOME Practice Quizzes Study Tips and Music Viruses Characteristics of Viruses. ... A host is a living cell in which viruses reproduce. They are selective when it comes to their host cell, one type of virus enters one type of cell, like a lock and key. ... viruses that infect bacteria have a tail used for attachment.
