It is a practical guide to operative trauma surgery for residents and registrars, for general surgeons with an interest in trauma, and for isolated surgeons operating on wounded patients in military, rural or humanitarian settings. A surgical atlas may show you what to do with your hands but not how to think, plan and improvise. Here you will find practical advice on how to use your head as well as your hands when operating on a massively bleeding trauma patient. The first part of this book presents some general principles of trauma surgery. The second part is about trauma surgery as a contact sport.

Here we show you how to deal with specific injuries to the abdomen, chest, neck and peripheral vessels. The single most important lesson we hope you will derive from this book is to always keep it simple because, in trauma surgery, the simple stuff works.

Hamilton Bailey was a legendary figure during his lifetime. He is still perceived as a great surgeon, though his fame rests less upon his prowess in the operating theatre than on his qualities as a writer and teacher. His textbooks, although constantly rewritten and updated, still command worldwide sales. Of all those who have ever written about surgery, Bailey is without doubt by far the most widely read. A large, strong man, with an air of self-confidence and authority, he had no difficulty in dominating those around him, but this imposing physique concealed a troubled and fragile mind. There was a family background of mental illness, and an accumulation of stresses and tragedies finally broke him down. What followed represents one of the most remarkable case histories in twentieth-century psychiatry. Originally published in 1999, this biography tells the story of

Bailey's extraordinary life, in the light of much fresh evidence and original research.

FINALIST FOR THE 2020 HILARY WESTON WRITERS' TRUST PRIZE FOR NONFICTION "Combining his poetic sensibilities and storytelling skills with a documentarian's eye, [Heighton] has created a wrenching narrative." —2020 Hilary Weston Writers' Trust Prize for Nonfiction Jury In the fall of 2015, Steven Heighton made an overnight

decision to travel to the frontlines of the Syrian refugee crisis in Greece and enlist as a volunteer. He arrived on the isle of Lesbos with a duffel bag and a dubious grasp of Greek, his mother's native tongue, and worked on the landing beaches and in OXY—a jerrybuilt, ad hoc transit camp providing simple meals, dry clothes, and a brief rest to refugees after their crossing from Turkey. In a town deserted by the tourists that had been its lifeblood, Heighton—alongside the exhausted locals and under-equipped international aid workers—found himself thrown into emergency roles for which he was woefully unqualified. From the brief reprieves of volunteer-refugee soccer matches to the riots of Camp Moria, *Reaching Mithymna* is a firsthand account of the crisis and an engaged exploration of the borders that divide us and the ties that bind.
