This is different from regular aggression, because it is typically sneaky and subtle. In the third chapter of this book, self-help scams are addressed. The self-help industry is a multi-billion-dollar industry that feeds on the gullible wishful thinking of the ones who go to seminars, buy books, overpriced courses, etc. Among other things, we'll also discuss topics like the power of influence, especially in the world of the internet; and we will go into what peer pressure does to youngsters and adults. All in all, in only a short book, you'll become more familiar with a range of fascinating topics related to the darkest psychology of mankind.

Napoleon's Buttons is the fascinating account of seventeen groups of molecules that have greatly influenced the course of history. These molecules provided the impetus for early exploration, and made possible the voyages of discovery that ensued. The molecules resulted in grand feats of engineering and spurred advances in medicine and law; they determined what we now eat, drink, and wear. A change as small as the position of an atom can lead to enormous alterations in the properties of a substance-which, in turn, can result in great historical shifts. With lively prose and an eye for colorful and unusual details, Le Couteur and Burreson offer a novel way to understand the shaping of civilization and the workings of our contemporary world.
