Carter and Pickett explore how educators and families can teach peace education through youth literature and literacy development. Showing how to assess, choose, and make use of literature that can be used to teach both literacy and peace

education, they walk through individual methods: recognizing and teaching different portrayals of conflict in youth literature, analyzing characterization, and examining the role of illustrations.

Educators who want to incorporate peace education within a broader, literacy-focused curriculum, and peace educators looking for age-appropriate materials and methodologies will find *Youth Literature for Peace Education* a rich and interdisciplinary resource.

As the markets in transitional economies open and grow, major challenges and opportunities arise for multinational firms entering these markets, local firms facing these new competitors, and policymakers

seeking to increase the ability of all firms to compete fairly and efficiently. Yet despite the important questions transition economies pose for policymakers and companies seeking to enter and compete in these new markets, there has been a relative absence of systematic research on these concerns. This book seeks to fill a gap in the existing literature by offering a pioneering and comprehensive examination of issues that have developed as markets in transitional economies become more deregulated and open. The countries discussed include China, the Czech Republic, Hungary, India, Poland, Romania, Russia, South Africa and South Korea. The topics covered are divided into five main sections, and the individual chapters are written by some of the world's leading academic experts on these issues. Most of the authors draw from freshly-collected data in new studies of consumers and/or firms in transitional economies. After an opening section which discusses the marketing issues and challenges multinational and local firms face in transitional economies, the next three sections offer detailed treatments of changing consumer behavior, measuring and improving the marketing orientation of firms, and implementing and managing distribution channels. The fifth and final section is devoted to firm strategies and

tactics, examined variously from the perspective of multinational firms entering these new markets, from the viewpoint of existing local firms facing new competitive challenges from global entrants, and from the perspective of local firms seeking to establish themselves in foreign markets where they have not previously competed. Most of the individual chapters are revised versions of papers originally presented at a conference sponsored by the William Davidson Institute, which focuses on research related to emerging and transitional economies, and have not previously appeared in published form. Thus, the book is a unique collection of cutting-edge scholarship on the various aspects of marketing in transitional economies. It will prove valuable reading to academics, policymakers, and international business strategists. The Marwari Heritage Jaipuria Publishing House  
Excerpt from The Tribes and Castes of the North-Western Provinces and Oudh, Vol. 4 of 4 Mughul, Mughul. - One of the four great Muhammadan sub divisions known in Europe under the form Mongol. Mr. Ibbetson, ' writing of the panjab, does not attempt to touch upon the much debated question of the distinction between the Turks and Mughuls. In the

Delhi territory, indeed, the villagers accustomed to describe the Mughuls of the Empire as Turks, used the word as synonymous with official, and I have heard my Hindu clerks of Kayasth class described as Turks, merely because they were in Government employ. On the Biloch frontier the word Turk is commonly used as synonym ous with Mughul. The Mughuls preper probably either entered the Paujfib with Babar, or were attracted thither under the dynasty of his successors; and I believe that the great majority of those who have returned themselves as Mughuls in the Eastern Panjab really belong to that race. In these Provinces they say that they take their name from their ancestor Mughul Khan. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. This book addresses the major generators of conflict and toleration at shared holy places in Palestine and Israel. Examining the religious, political and legal issues, the authors show how the holy sites have been a focus of both conflict and cooperation between different communities. Bringing together the views of a diverse group of experts on the region, Holy Places in the Israeli-Palestinian Conflict provides a new and multifaceted approach to holy places, giving an in-depth analysis of relevant issues. Themes covered include legal regulation of holy places; nationalization and reproduction of holy space; sharing and contesting holy places; identity politics; and popular legends of holy sites. Chapters cover in detail how recognition and authorization of a new site come about; the influence of religious belief versus political ideology on the designation of holy places; the centrality of such areas to the surrounding political developments; and how historical background and culture affect the perception of a holy site and relations between conflicting groups. This new approach to the study of holy places and

the Israeli-Palestinian conflict has great significance for a variety of disciplines, and will be of great interest in the fields of law, politics, religious studies, anthropology and sociology.

The last years have seen a profusion of books and articles on managing technology, focused almost exclusively on leading edge firms in leading edge countries. This book argues that succeeding as a follower-firm requires learning from many experiences and avoiding simplistic 'how-to' approaches that prescribe one best practice. Individual chapters cover: \* the role of innovation on the shop-floor \* the importance of mixing process and product innovation \* the challenges involved in building an innovation culture \* the special role of R&D and design. These topics instruct a deeper understanding of strategy in follower-firms, simultaneously providing insight for public policy in building local technological capacity. Forbes and Wield argue that there are many 'leading edges' which appear in the most unlikely places. Their book

contains major case studies from many different firms in twelve countries over five continents, in industry segments as diverse as pharmaceuticals, software, garments, beer and steel. This informative book for students, researchers and professionals in the fields of business, management and information technology shows that successful experiences can arise anywhere in the world.

From the early Vedic period, the Vaishyas, the oldest mercantile community of India, generated wealth for the nation through their remarkable efforts. Their Marwari offshoots were appointed by many rulers as ministers, advisors and diwans and were recognised as the first philanthropists in India. The Marwari Heritage takes the reader on a voyage of discovery of the Marwaris who migrated from Rajputana, Haryana, Malwa and its adjoining regions to other parts of India. They braved trials and tribulations in unchartered territories, supporting others of their community, never losing faith in their ability to succeed, and focused on their goal, they became the uncrowned kings, first of trade and business, and later of industry. They

---

joined the freedom struggle with a true spirit of patriotism, philanthropy and active political involvement. Many courted imprisonment and even achieved martyrdom. Today, the roots of the Marwari community are deeply enmeshed in the social, cultural and economic fabric of India. Their innate psyche of giving back to society has seen them donate generously to education, empowerment of women and vocational training leading to employment. Shedding some traditions and retaining many, they have stepped into the modern age, achieving an enviable cultural mix. At the helm of most successful entrepreneurial enterprises, their focus on innovation and technological advancement has resulted in governments of several countries seeking their advice on economic growth. Of the many who have left an indelible mark on the history, socio-political and economic foundations of the country, this book is enriched with rich cameos of some of these 'greats' and the reader derives insights into numerous newly discovered and hitherto unrecorded facts. The younger generation of Marwaris continue to dream big and build on the foundations their forefathers planted. They continue to grow from strength to strength, marching towards new horizons. The plethora of welfare schemes and trusts

responsible for development of the nation's needy continue to be monitored with precision. Meticulously researched over five years and richly illustrated with over 100 rare, coloured photographs, paintings, and 600 black and white photographs, illustrations and rare documents published for the first time, readers have much to feast their eyes on. This pictorial book also serves as an inspiration to any and everyone who dares to dream and reach for the skies. Reliance, an Industrial Legend

Reforms at Risk is the first book to closely examine what happens to sweeping and seemingly successful policy reforms after they are passed. Most books focus on the politics of reform adoption, yet as Eric Patashnik shows here, the political struggle does not end when major reforms become enacted. Why do certain highly praised policy reforms endure while others are quietly reversed or eroded away? Patashnik peers into some of the most critical arenas of domestic-policy reform--including taxes, agricultural subsidies, airline

deregulation, emissions trading, welfare state reform, and reform of government procurement--to identify the factors that enable reform measures to survive. He argues that the reforms that stick destroy an existing policy subsystem and reconfigure the political dynamic. Patashnik demonstrates that sustainable reforms create positive policy feedbacks, transform institutions, and often unleash the "creative destructiveness" of market forces. Reforms at Risk debunks the argument that reforms inevitably fail because Congress is prey to special interests, and the book provides a more realistic portrait of the possibilities and limits of positive change in American government. It is essential reading for scholars and practitioners of U.S. politics and public policy, offering practical lessons for anyone who wants to ensure that hard-fought reform victories survive.

Creation of a constructive work is often driven by two types of forces. One, which directs, assists the artist by being physically present. The other force is the source of inspiration. In this piece of research undertaken by me, the impelling force has been my mother, late Prof. (Mrs) Sheetalta Abasaheb Burghate . An academician herself, she always encouraged me to give my best. As a token of respect and admiration, which can never be adequately expressed, I dedicate this research project to her.

When it was first introduced in 1949, the Vespa scooter was an entirely new type of vehicle, the result of a flash of inspiration followed by innovative engineering and astute marketing. The author tells the story of this remarkable two-wheeler, from its Italian origins through 40 years of development, with anecdotes about the machines and the colourful characters

involved with them.

The story of my life essentially focuses on how politics destroyed an assiduously built industrial empire; how I fought a long but unsuccessful legal battle for getting my textile mills back; and how I eventually succeeded in reinventing life in the very industry I always loved. The origin of the House of Jaipurias dates back to 1914, when my father, Seth Mungturamji Jaipuria, left our native town of Nawalgarh (in Rajasthan) to travel to Kolkata (earlier Calcutta), which was then India ' s industrial and commercial hub, and had been its official capital till 1911. (Delhi then acquired that privilege.) I have tried to explain the evolution of the Jaipuria Group, as well as of the Indian textile industry, in as lucid a manner as I could. I hope the young entrepreneurs, as well as the students of management, apart from the public at large, would find my narrative educative and, if I may say so, inspiring. I hope this book would not only help the younger generation understand India ' s industrial history and the roots of its own entrepreneurial abilities but would also inspire some of the few remaining entrepreneurs of my generation to record their life histories and share their rich

experience, besides warning present and future governments about the dangers of unnecessary meddling in affairs of industry and trade.

How can children grow to realize their inherent human rights and respect the rights of others? This book explores this question through children's literature from 'Peter Rabbit' to 'Horton Hears a Who!' to Harry Potter. The authors investigate children's rights under international law - identity and family rights, the right to be heard, the right to be free from discrimination, and other civil, political, economic, social and cultural rights - and consider the way in which those rights are embedded in children's literature.

Being a film-fan, the author has been in touch with the Indian Cinema from V. Shantaram's "Dahez" of 1948 to Arbaaz Khan's "Dabang" of 2012. During the six decades, he has come across to a good number of film personalities who are to be seen on the screen by the audience and also those who are behind the Indian

Cinema. The present book covers both the aspects and revolves around not only to heroes and heroines but also to producers, directors, music directors, lyrics, songs, singers, choreographers and cameramen. It is a handy encyclopedia to all the cinegoers who want to add their latest knowledge in the field of old and new films pertaining to myth and romance respectively. The readers will get sufficient material pertaining to all the films from Ashok Kumar to Akshay Kumar, Madhubala to Anuska Sharma, Anil Biswas to Pritam Chakraborty and Jaan Nissar Akhtar to Farhan Akhtar. All the eight chapters of this book are so beautifully intertwined that they can't be easily separated. The book systematically covers all the aspects of Indian Cinema starting from the beginning days to the recent times in an informative as well as interesting way.

' constant ' factor. In the last few decades, there has been a radical change in how organizations function. To survive in this highly volatile environment, companies need a long-term strategic vision and thinking. In light of this, ' strategic management ' has become a significant topic and is taught as the core subject in MBA/PGDM programmes in Indian universities and business schools. This is a book written in the context of the Indian business environment but with a global orientation. It is comprehensive and contemporary in its approach.
