General Adams reflects on his experiences in the cold war, during which he served in both manned bombers and missile silos. He tells stories of famous and not-so-famous cold warriors, including some from the US Navy. Some stories are humorous; some stories are tragic. Having traveled extensively in Russia and some former Soviet Union states after retirement, General Adams tells us about his former adversaries, the Soviet cold warriors. In the process, he leaves no doubt about his respect for all who served so valiantly in the "strategic triad"-- the strategic command, the ICBM force, and the submarine Navy.

NPR Best Books of 2017 In this sweeping history of popular music in the United States, NPR 's

acclaimed music critic examines how popular music shapes

fundamental American ideas and beliefs, allowing us to

communicate difficult emotions and truths

about our most fraught social issues, most notably sex and race.

In Good Booty, Ann Powers explores how popular music became America 's primary

erotic art form. Powers takes us from nineteenth-century New Orleans through dance-crazed Jazz Age New York to the teen scream years of mid-twentieth century rock-and-roll to the cutting-edge adventures of today ' s web-based pop stars. Drawing on her deep knowledge and insights on gender and sexuality, Powers recounts stories of forbidden lovers, wild shimmy-shakers, orgasmic gospel singers, countercultural perverts, soft-rock sensitivos, punk Puritans, and the cyborg known as Britney Spears to illuminate how eroticism—not merely sex, but love, bodily freedom, and liberating joy—became entwined within the rhythms and melodies of American song. This cohesion, she reveals, touches the heart of America's anxieties and hopes about race, feminism, marriage, youth, and freedom. In a survey that spans more than a century of music, Powers both heralds little known artists such as Florence Mills, a contemporary of Josephine Baker, and gospel queen Dorothy Love Coates, and sheds new light on artists we think we know well, from the Beatles and Jim Morrison to Madonna and Beyoncé . In telling the history of how American popular music and sexuality

intersect—a magnum opus over two decades in the making—Powers offers new insights into our nation psyche and our soul.

Heathkit was world renowned as a manufacturer of electronics in kit form. This book covers Heathkit's test equipment, starting with a brief history of Heathkit, an overview of the test equipment product lines and tips on buying and restoring vintage test equipment from sources like eBay. Separate chapters cover the major categories of component testers and substitution boxes, frequency counters, meters, oscilloscopes, power supplies, signal generators, tube testers and checkers and miscellaneous test equipment. Each chapter includes one or

more "In-Depth" sections that look at a representative model from the author's Heathkit collection covering its features, operation, and notable quirks or trivia. The appendix provides a list of references and resources including books, web sites, and suppliers of parts, manuals and related products and services as well as a detailed product listing of every known model of test equipment produced by Heathkit.

Autobiography of jazz elder
statesman Frank " Doc "
Adams, highlighting his role in
Birmingham, Alabama ' s,
historic jazz scene and tracing his
personal adventure that parallels,
in many ways, the story and
spirit of jazz itself. Doc tells the

story of an accomplished jazz master, from his musical apprenticeship under John T. “ Fess ” Whatley and his time touring with Sun Ra and Duke Ellington to his own inspiring work as an educator and bandleader. Central to this narrative is the often-overlooked story of Birmingham ’ s unique jazz tradition and community. From the very beginnings of jazz, Birmingham was home to an active network of jazz practitioners and a remarkable system of jazz apprenticeship rooted in the city ’ s segregated schools. Birmingham musicians spread across the country to populate the sidelines of the nation ’ s bestknown bands. Local musicians, like Erskine Hawkins and members of his celebrated orchestra, returned home heroes. Frank “ Doc ” Adams explores, through first-hand experience, the history of this community, introducing readers to a large and colorful cast of characters—including “ Fess ” Whatley, the legendary “ maker of musicians ” who trained legions of Birmingham

players and made a significant mark on the larger history of jazz. Adams ’ s interactions with the young Sun Ra, meanwhile, reveal life-changing lessons from one of American music ’ s most innovative personalities. Along the way, Adams reflects on his notable family, including his father, Oscar, editor of the Birmingham Reporter and an outspoken civic leader in the African American community, and Adams ’ s brother, Oscar Jr., who would become Alabama ’ s first black supreme court justice. Adams ’ s story offers a valuable window into the world of Birmingham ’ s black middle class in the days before the civil rights movement and integration. Throughout, Adams demonstrates the ways in which jazz professionalism became a source of pride within this community, and he offers his thoughts on the continued relevance of jazz education in the twenty-first century. "Military historian and Civil Air Patrol (CAP) member Frank A. Blazich Jr. collects oral and written histories of the CAP's short-lived--but influential--coastal air patrol operations of World War II and expands it in a scholarly monograph that cements the legacy of this vital civil-military cooperative effort"--Aviation in the U.S. Army, 1919-1939

The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more

difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.

Inside the Cold War Rarely is a reader exposed to such an extraordinary, multifaceted presentation of aerospace technology as Bob Brulle narrates in this book. After returning from duty as a combat fighter pilot in World War II, this Belgian immigrant developed a multitalented and innovative aerospace career path that addressed many of the aerospace professions. Along the way he forged a career in the aviation and space field that resulted in his participating in several of the

most momentous aerospace achievements of the past century. He also expanded his education through hard work to a level at which he was qualified to teach graduate-level aerospace engineering courses. It is interesting to follow how the analysis and design techniques of aerospace vehicles progressed over the years, which incidentally reveals the large role that the computer played in making that possible. The story on the early Cape Canaveral operations was amusing and showed that enterprising innovations played a large role in a successful undertaking. Some of the projects described were a surprise, as I had never heard of them, like reading how a pencil-shaped missile was built that could fly and maneuver over an intercontinental distance at a high hypersonic velocity. He also described how American engineers and scientists fought the Cold War battle for technological supremacy on their desks and in their laboratories. The initiatives by which this enterprising engineer develops his technical

approach to a project are very informative and offer the reader an insight into the workings of successful operations. He achieves an interesting behind-the-scenes look at how aerospace history is made by weaving in the historical significance of these projects as they are developed. As a former aeronautical engineer at the rapidly growing Mc- Donnell Aircraft Corporation, Bob gives us an interesting exposure to the importance of top management's relationship with the workforce in a successful company. "Mr. Mac" made it a point to make all his employees team members by frequent communication and friendly association.
