This book is an examination of American army legal proceedings that resulted from a series of moments when soldiers in a war zone crossed a line between performing their legitimate functions and committing crimes against civilians, or atrocities. Using individual judicial proceedings held within war-time Southeast Asia, Louise Barnett analyses how the American military legal system handled crimes against civilians and determines what these cases reveal about the way that war produces atrocity against civilians. Presenting these atrocities and subsequent trials in a way that considers both the personal and the institutional the author considers how and why atrocity happens, the terrain of justification, and the degree to which the army and American society have been willing to take military crimes against civilians seriously. Atrocity and American Military Justice in Southeast Asia will be of interest to students, scholars and professionals interested in Military Justice, Military history and Southeast

Asian History more generally.

If You Could Talk To The Greatest Master of This Century - What Would You Ask? The sages of the centuries, each one tincturing their thought with their own soul essence, have united in telling us that, ""As a man thinketh in his heart, so is he."" It has been established by the experience of the ages that always the law is the same. But HOW shall one think in their heart, so that only goodness may blossom and ripen into rich deed and rare result? What is the apparently mysterious secret by which life's dull metal is transmuted into precious mintage? As Troward has said, ""Thought is the only

action of the mind. By your habitual thoughts you create corresponding external physical conditions, because you thereby create the nucleus which attracts to itself its own correspondence, in due order, until the finished work is manifested on the material plane."" Let us work together to this end. G.B (from the Foreward) Get Your Copy Now!

Rosie "Aunty" Lee, the feisty widow, amateur sleuth, and proprietor of Singapore's best-loved home cooking restaurant, is back in another delectable, witty mystery involving scandal and murder among the city's elite. Few know more about what goes on in Singapore than Aunty Lee.

When a scandal over illegal organ donation involving prominent citizens makes news, she already has a list of suspects. There's no time to snoop, though—Aunty Lee's Delights is catering a brunch for local socialites Henry and Mabel Sung at their opulent house. Rumor has it that the Sung's fortune is in trouble, and Aunty Lee wonders if the gossip is true. But soon after arriving at the Sung's house, her curiosity turns to suspicion. Why is a storage house she discovers locked? What is the couple arguing about behind closed doors? Where is the guest of honor who never showed up? Then, Mabel Sung and her son Leonard are found dead. The authorities blame it on Aunty Lee's special stewed chicken with buah keluak, a local black nut that can be poisonous if cooked improperly. Aunty Lee has never carelessly prepared a dish. She's certain the deaths are murder—and that they're somehow linked to the organ donor scandal. To save her business and her reputation, she's got to prove it—and unmask a dangerous killer whose next victim may just be Aunty Lee.

?The introduction of Enterprise
Identity Management Systems
(EIdMS) in organizations even
beyond the purely technological
level is a costly and challenging
endeavor. However, for decision
makers it seems difficult to fully
understand the impacts and
opportunities arising from the
introduction of EIdMS. This
book explores the relevant
aspects for an ex-ante evaluation
of EIdMS. Therefore it examines
this domain by employing a
qualitative expert interview study
to better understand the nature of
EIdMS, as they are situated

between security and productive IT systems. To this regard, the focus is put on the general nature of EIdMS projects and the constructs being relevant for analyzing such projects in the decision support phase. Based on the derived constructs and thematic topics from the interviews, an explanatory model for EIdMS introductions is derived and iteratively improved and evaluated. Finally, a possible application use-case for the creation of adequate decision support tools is presented.
