Ethical Practice of Social Media in Public Relations Cengage Learning

Given the high rate of social media use by the public, organizations are compelled to engage with key audiences through these outlets. Social media engagement requires organizations to actively participate with public groups, and this highly-interactive exchange raises a new set of ethical concerns for communicators. In this rapidly changing communications environment, the long-term implications of social media are uncertain, and this book provides the much needed research to understand its impact on audiences and organizations. Through an examination of a broad range of ethics concepts including transparency and online identities, policies, corporate responsibility, and measurement, this book explores a variety of topics important to public relations such as diversity, non-profit communication, health communication, financial communication, public affairs, entertainment communication, environmental communication, crisis communication, and non-profit communication. The chapter authors, expert scholars within their fields of public relations, offer insights drawn from original research and case study examples of ethical dilemmas raised by social media communication.

The 2nd edition of this successful book has several new features. The calibration discussion of the basic LIBOR market model has been enriched considerably, with an analysis of the impact of the swaptions interpolation

technique and of the exogenous instantaneous correlation on the calibration outputs. A discussion of historical estimation of the instantaneous correlation matrix and of rank reduction has been added, and a LIBOR-model consistent swaption-volatility interpolation technique has been introduced. The old sections devoted to the smile issue in the LIBOR market model have been enlarged into a new chapter. New sections on local-volatility dynamics, and on stochastic volatility models have been added, with a thorough treatment of the recently developed uncertain-volatility approach. Examples of calibrations to real market data are now considered. The fast-growing interest for hybrid products has led to a new chapter. A special focus here is devoted to the pricing of inflation-linked derivatives. The three final new chapters of this second edition are devoted to credit. Since Credit Derivatives are increasingly fundamental, and since in the reduced-form modeling framework much of the technique involved is analogous to interest-rate modeling, Credit Derivatives -- mostly Credit Default Swaps (CDS), CDS Options and Constant Maturity CDS - are discussed, building on the basic short rate-models and market models introduced earlier for the default-free market. Counterparty risk in interest rate payoff valuation is also considered, motivated by the recent Basel II framework developments.

Leadership: Research Findings, Practice, and Skills Wolters Kluwer

Structuring Commercial Real Estate Workouts: Alternatives to Bankruptcy and Foreclosure, Second Edition presents a concise introduction to the legal and business considerations involved in real estate loan workouts. It is designed to aid lenders, borrowers and their legal counsel in confronting the variety of issues encountered in working out an acceptable solution to the dilemma posed by a loan in default. The parties associated with a defaulting loan face a number of potential pitfalls, ranging from imminent insolvency of the borrower (and the diminution in value or loss of a lender's security interest) to draconian penalties incurred through liability for environmental hazards present on the property. Structuring Commercial Real Estate Workouts introduces the varied issues, discusses the limitations and advantages of foreclosure and other remedies, and presents suggestions for guiding potential alternative courses of action. The Second Edition features extensive coverage of environmental liabilities that may arise under federal statutes and regulations such as RCRA and CERCLA and how lenders can avoid or minimize these liabilities. A new chapter has been added on the state mini-RCRAs and CERCLAs, necessitated by the growing importance of state environmental laws to real estate financing. A detailed discussion is presented on the laws and programs that have been developed to minimize lender liability at "brownfields" sites in urban areas. Excellent coverage is provided for such key areas as prepackaged plans, single asset real estate cases, cash collateral and adequate protection, deeds in lieu of foreclosure and dealing with guarantors and other sureties.
