A detailed study of the attractive Arado Ar 196, one of the last fighting seaplanes. It was the standard seagoing aircraft for the German Kriegsmarine during World War II, providing the Luftwaffe with reach into the southern oceans. Beating its biplane rivals in a 1936 Reich Air Ministry design competition, the Arado Ar 196 provided the Kriegsmarine with possibly the best shipborne reconnaissance seaplane of World War II. Replacing the Heinkel He 60 biplane as the standard catapult-launched floatplane embarked on the Kriegsmarine's capital ships, the Ar 196 flew an assortment of combat missions during World War II, including coastal patrol, submarine hunting, light bombing, general reconnaissance, and convoy escort sorties. The first vessel to take its Ar 196A-1s to sea was the pocket battleship Graf Spee, which embarked two in the autumn of 1939. The battleships Bismarck and Tirpitz could carry six Arados each, the battlecruisers Gneisenau and Scharnhorst four, and smaller pocket battleships and cruisers two. Shore-based aircraft were also operated from coastal ports on the Channel, Baltic, North Sea, and Bay of Biscay coasts, as well as in the Balkans and Mediterranean. In this title, supported by an excellent selection of photographs and full-color illustrations, Peter de Jong explores the history of the Arado Ar 196, detailing their development and assessing the combat capabilities of one of the last fighting seaplanes.

Most people don't believe in monsters, but you know the truth. They're real, and it's your task to bring them down. This revised edition of Monster of the Week brings that adventure to life. Monster of the Week is a standalone action-horror RPG for 3-5 people. Hunt high school beasties a la Buffy the Vampire Slayer, travel the country to bring down unnatural creatures like the Winchester brothers of Supernatural, or head up the government investigation like Mulder and Scully. This book contains everything you need to tackle Bigfoot, collar a chupacabra, and drive away demons. In this revised edition, you'll find:

Designed as a replacement for the U.S. Navy's F2H Banshee, the McDonnell F3H Demon fighter served with the fleet for nearly a decade, including during the Cuban Missile Crisis. Although it could not fly at supersonic speeds, the Demon served admirably as an all-weather interceptor and flew alongside the F8U Crusader and F11F Tiger. Armed with up to four 20mm cannons, the aircraft could also fire Sidewinder and Sparrow missiles. Over 500 Demons were built. The planes were dubbed "The Chair" by pilots due to its high-visibility cockpit, but it was also called the "lead sled" due to its poor power to weight ratio. The Demon was replaced by the F-4 Phantom in 1964. Originally printed by McDonnell and the U.S. Navy, this F3H Demon Pilot's Flight Operating Instruction manual taught pilots everything they needed to know before entering the cockpit. Originally classified "Restricted", the manual was declassified long ago and is here reprinted in book form.

A fully illustrated study into the extraordinary Convair B-36 during the Cold War. Conceived during 1941 in case Germany occupied Britain, when US bombers would then have insufficient range to retaliate, the B-36 was to be primarily a '10,000-mile bomber' with heavy defensive armament, six engines and a performance that would prevent interception by fighters. Although rapid developments in jet engine and high-speed airframe technology quickly made it obsolescent, the B-36 took part in many important nuclear test programmes. The aircraft also provided the US nuclear deterrent until the faster B-52 became available in 1955. It was one of the first aircraft to use substantial amounts of magnesium in its structure, leading to the bomber's 'Magnesium Overcast' nickname. It earned many superlatives due to the size and complexity of its structure, which used 27 miles of wiring, had a wingspan longer than the Wright brothers' first flight, equivalent engine power to 400 cars, the same internal capacity as three five-room houses and 27,000 gallons of internal fuel — enough to propel a car around the world 18 times. Much was made of the fact that the wing was deep enough to allow engineers to enter it and maintain the engines in flight. B-36s continued in the bomber and reconnaissance role until their retirement in February 1959 following 11 years in SAC. Convair employees were invited to suggest names for the giant aircraft, eliciting suggestions such as 'King Kong Bomber', 'Condor', 'Texan' and 'Unbelievable', but the most popular was 'Peacemaker'. Oddly, objections from religious groups deterred the USAF from ever adopting it officially. This fully illustrated volume includes first-hand accounts, original photographs and up to 30 profile artworks depicting in detail the complexity of this superlative aircraft.

I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures. Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called 'elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to The New Science of Strong Materials it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P. Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness. Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge - especially for discussions about biomechanics which extended over a period of nearly thirty years. Lastly, for reasons which must surely be obvious, I owe a humble oblation to Herodotus, once a citizen of Halicarnassus.

The DNA of business has changed. Forever. You can blame technology, smartphones, social media, online shopping and everything else, but nothing changes this reality: we are in a moment of business purgatory. So, what are you going to do about it? Mitch Joel, one of the world's leading experts in new media, warns that the time has come to CTRL ALT DELETE. To reboot and to start re-building your business model. If you don't, Joel warns, not only will your company begin to slide backwards, but you may find yourself unemployable within five years. That's a very strong warning, but in his new book, CTRL ALT DELETE, Joel explains the convergence of five key movements that have changed business forever. The movements have already taken place, but few businesses have acted on them. He outlines what you need to know to adapt right now. He also points to the seven triggers that will help you take advantage of these game-changing factors to keep you employable as this new world of business unfolds. Along the way, Joel introduces his novel concept of "squiggle" which explains how you can learn to adapt your personal approach to your career, as new technology becomes the norm. In short, this is not a book about "change management" but rather a book about "changing both you AND your business model."

“ A chronicle of one summer in a boy ’ s coming of age ” —the international bestselling classic that became the basis for the Oscar-winning film (Medium). Captivating and evocative, Herman Raucher ’ s semi-autobiographical tale has been made into a record-breaking Academy Award-winning hit movie, adapted for the stage, and enchanted readers for generations. In the summer of 1942, Hermie is fifteen. He is wildly obsessed with sex, and passionately in love with an “ older woman ” of twenty-two, whose husband is overseas and at war. Ambling through Nantucket Island with his friends, Hermie ’ s indelible narration chronicles his frantic efforts to become a man, especially one worthy of the lovely Dorothy, as well as his glorious and heartbreaking initiation into sex. “ Mr. Raucher scores most tellingly. His recall of nervous teen-age gaucheries is dead accurate, hilarious, tinged with sadness. ” —The New York Times Book Review “ A charming and tender novel . . . The overall effect is one of high hilarity. Raucher is a comic-artist who is able to convey the fears and joys . . . of the boy and at the same time give older readers a wrench in the heart. ” —Publishers Weekly

At twelve-year-old Indian American boy believes he is the reincarnation of Krishna and plans to unveil his true identity at the school talent show. Meet Kiran Sharma: lover of music, dance, and all things sensual; son of immigrants, social outcast, spiritual seeker. A boy who doesn ’ t quite understand his lot—until he realizes he ’ s a god . . . As an only son, Kiran has obligations—to excel in his studies, to honor the deities, to find a nice Indian girl, and, above all, to make his mother and father proud—standard stuff for a boy of his background. If only Kiran had anything in common with the other Indian kids besides the color of his skin. They reject him at every turn, and his cretinous public schoolmates are no better. Cincinnati in the early 1990s isn ’ t exactly a hotbed of cultural diversity, and Kiran ’ s not-so-well-kept secrets don ’ t endear him to any group. Playing with dolls, choosing ballet over basketball, taking the annual talent show way too seriously...the very things that make Kiran who he is also make him the star of his own personal freak show . . . Surrounded by examples of upstanding Indian Americans—in his own home, in his temple, at the weekly parties given by his parents ’ friends—Kiran nevertheless finds it impossible to get the knack of “ normalcy. ” And then one fateful day, a revelation: perhaps his desires aren ’ t too earthly, but too divine. Perhaps the solution to the mystery of his existence has been before him since birth. For Kiran Sharma, a long, strange trip is about to begin—a journey so sublime, so ridiculous, so painfully beautiful, that it can only lead to the truth . . . Praise for Blue Boy “ Compassionate, moving, funny, and wise, Blue Boy is one of the best debut novels I have read in years. ” &mda
