Verbal Review: Book + Online

For millions of years, humankind has used a brilliantly successful survival strategy. If we like something, we chase after more of it: more status, more food, more info, more stuff. Then we chase again. Its how we survived famine, disease and disaster to colonise the world. But now, thanks to technology, weve suddenly got more of everything than we can ever use, enjoy or afford. That doesnt stop us from striving though and its making us sick, tired, overweight, angry and in debt. It burns up our personal

ecologies and the planets ecology too. We urgently need to develop a sense of enough. Our culture keeps telling us that we dont yet have all we need to be happy, but in fact we need to nurture a new skill the ability to bask in the bounties all around us. ENOUGH explores how our Neolithic brain-wiring spurs us to build a world of overabundance that keeps us hooked on more. John explains how, through adopting the art of enoughness, we can break from this wrecking cycle. With ten chapters on topics such as Enough food, Enough stuff, Enough hurry and Enough information, he explores how

we created the problem and gives us practical ways to make our lives better. 2018 Princeton Review Blending science fiction and fantasy, the second book of the Coldfire Trilogy continues a dark tale of an alien world where nightmares are made manifest. Two men, absolute enemies, must unite to conquer an evil greater than anything their world has ever known. One is a warrior priest ready to sacrifice anything and everything for the cause of humanity's progress; the other, a sorcerer who has survived for countless

centuries by a total submission to evil. In their joint quest, both will be irrevocably changed. When True Night Falls is the sequel to C. S. Friedman's acclaimed Black Sun Rising. Leonard Warren, American Baritone Penguin Poetry. "Matthew Lippman's poems know how to love as only a heart knows how to love. Swelling with rage, candor, humor, and empathy, his lyrics embrace vulnerability and grit that navigate the mire that the world lays before us each day. Their music makes singular reconciliations where

anxiety and angst are lent a tough and tender grace."—Michael Morse "Reading a Matthew Lippman poem is like encountering an unstoppable force—or forces. One moment you're walking down Broadway next to an old friend who's talking a mile a minute—he's on a tear, he's manic but eminently likable, and his monologue is heating up to the point of combustion. Another moment you're listening to a voiceover spoken by a hardboiled and vaguely hypnagogic private eye. And yet another moment you're at the

Tamarack Lodge in a Catskills of long ago listening to a crazed Borscht Belt comedian. And finally you're listening to a mystic intoning prophecies from deep in the reaches of a dream. I love poetry that takes me through such a range of voices, guises, poses, intensities, and diapasons, yet also manages to make me feel that I am in the presence of a truly human and truly real and singular personality. These poems were written by a man who takes much pleasure in moving through this mysterious world in language and in a body. He

wants to share this pleasure with us—and that is generous, and as good a reason for writing poems as any I can think of."—Geoffrey Nutter "Matthew's poems wake us up with brutal honesty and humor. If you think poetry has lost touch with everyday life, this book will restore your faith and welcome you back."—Rob MacDonald

They may ride off into the sunset, but cowboys never go out of style.
These manly men

embody the fiercely independent, earthy alpha male and hero who isn't afraid to show the gentle, nurturing side of his complex nature when faced with a woman in need. Even when he's coated with dust from riding behind a herd of cattle or up to his knees in mud freeing a calf from a wallow, this stud still generates a lot of Cowboy Heat. Delilah Devlin's *Cowboy Lust* was a sensation, hitting the top ten of romance books and generating a river of

praise. Award-winning Devlin is back on the ranch with stories of rugged romantics, rough riders, and rope wranglers sure to satisfy any reader who craves the idea of that gruff, romantic hero, a man of few words but many moves. *Cowboy Heat* sits tall in the saddle, winning hearts and spurring readers to new heights of happiness. Reinventing the Museum MIT Press Best known for his "Legend of Duluoaz"

novels, including *On the Road* and *The Dharma Bums*, Jack Kerouac is also an important poet. In these eight extended poems, Kerouac writes from the heart of experience in the music of language, employing the same instrumental blues form that he used to fullest effect in *Mexico City Blues*, his largely unheralded classic of postmodern literature. Edited by Kerouac himself, *Book of Blues* is an exuberant

foray into language and consciousness, rich with imagery, propelled by rhythm, and based in a reverent attentiveness to the moment. "In my system, the form of blues choruses is limited by the small page of the breastpocket notebook in which they are written, like the form of a set number of bars in a jazz blues chorus, and so sometimes the word-meaning can carry from one chorus into another,

or not, just like the phrase-meaning can carry harmonically from one chorus to the other, or not, in jazz, so that, in these blues as in jazz, the form is determined by time, and by the musicians spontaneous phrasing & harmonizing with the beat of time as it waves & waves on by in measured choruses."

Wicked Words 3 John Wiley & Sons

Trinidad is known for its vibrant musical traditions, which reflect the island's ethnic diversity. The annual Carnival, far and away the biggest event in Trinidad, is filled with soca and calypso music. Soca is a dance music derived from calypso, a music with African antecedents. In parang, a

Venezuelan and Spanish derived folk music that dominates Trinidadian Christmas festivities, groups of singers and musicians progress from house to house, performing for their neighbors. Chutney is also an Indo-Caribbean music. In *Bacchanalian Sentiments*, Kevin K. Birth argues that these and other Trinidadian musical genres and traditions not only provide a soundtrack to daily life on the southern Caribbean island; they are

central to the ways that Trinidadians experience and navigate their social lives and interpret political events. Birth draws on fieldwork he conducted in one of Trinidad's ethnically diverse rural villages to explore the relationship between music and social and political consciousness on the island. He describes how Trinidadians use the affective power of music and the physiological experience of performance to express

and work through issues related to identity, ethnicity, and politics. He looks at how the performers and audience members relate to different musical traditions. Turning explicitly to politics, *Birth* recounts how Trinidadians used music as a means of making sense of the attempted coup d' état in 1990 and the 1995 parliamentary election, which resulted in a tie between the two major political parties. *Bacchanalian Sentiments*

is an innovative ethnographic analysis of the significance of music, and particular musical forms, in the everyday lives of rural Trinidadians. *Stories Urban Books* An alien war has engulfed Earth. Western Romance for Women Wiley

The evolution of a discipline at the intersection of physics, chemistry, and mathematics. Quantum chemistry—a discipline

that is not quite physics, not quite chemistry, and not quite applied mathematics—emerged as a field of study in the 1920s. It was referred to by such terms as mathematical chemistry, subatomic theoretical chemistry, molecular quantum mechanics, and chemical physics until the community agreed on the designation of quantum chemistry. In *Neither Physics Nor Chemistry*, Kostas Gavroglu and Ana Simões examine the evolution of quantum

chemistry into an autonomous discipline, tracing its development from the publication of early papers in the 1920s to the dramatic changes brought about by the use of computers in the 1970s. The authors focus on the culture that emerged from the creative synthesis of the various traditions of chemistry, physics, and mathematics. They examine the concepts, practices, languages, and institutions of this new culture as well as the

people who established it, from such pioneers as Walter Heitler and Fritz London, Linus Pauling, and Robert Sanderson Mulliken, to later figures including Charles Alfred Coulson, Raymond Daudel, and Per-Olov Löwdin. Throughout, the authors emphasize six themes: epistemic aspects and the dilemmas caused by multiple approaches; social issues, including academic politics, the impact of textbooks, and the forging of alliances; the

contingencies that arose at every stage of the developments in quantum chemistry; the changes in the field when computers were available to perform the extraordinarily cumbersome calculations required; issues in the philosophy of science; and different styles of reasoning.

Capital Returns Turtleback Drawing on philosophical, psychological, and evolutionary perspectives, Bogdan analyzes how primates create the resources for

"metamentation"—the ability of the mind to think about its own thoughts. Mental reflexivity, or metamentation—a mind thinking about its own thoughts—underpins reflexive consciousness, deliberation, self-evaluation, moral judgment, the ability to think ahead, and much more. Yet relatively little in philosophy or psychology has been written about what metamentation actually is, or about why and how it came about. In this book, Radu Bogdan proposes that humans think reflexively because they interpret each other's minds in social

contexts of cooperation, communication, education, politics, and so forth. As naive psychology, interpretation was naturally selected among primates as a battery of practical skills that preceded language and advanced thinking. Metamentation began as interpretation mentally rehearsed: through mental sharing of attitudes and information about items of common interest, interpretation conspired with mental rehearsal to develop metamentation. Drawing on philosophical, psychological, and evolutionary perspectives,

Bogdan analyzes the main phylogenetic and ontogenetic stages through which primates' abilities to interpret other minds evolve and gradually create the opportunities and resources for metamentation. Contrary to prevailing views, he concludes that metamentation benefits from, but is not a predetermined outcome of, logical abilities, language, and consciousness.
