The heroine is Athens, at the height of her schizophrenic glory. A startling mixture of comedy and tragedy, THE WALLED ORCHARD is the poignant, charming story of their turbulent relationship. With unforgettable characters and a powerful and moving story, THE WALLED ORCHARD is a wonderful evocation of life in Ancient Greece in the fifth century BC. From the moment Homo Sapiens descended from the trees, possibly onto their heads, humanity has striven towards civilization. Fire. The Wheel. Running Away from furry things with more teeth than one might reasonably expect—all are testament to man's ultimate supremacy. It is a noble story and so, of course, complete and utter fiction. For one man has discovered the hideous truth: that humanity's ascent to civilization has been ruthlessly guided by a small gang of devious frogs. The man's name is David Perkins, and his theory is not, on the whole, widely admired, particularly not by the frogs themselves, who had invested a great deal of time and effort in keeping the whole thing quiet.

Discover the unexpected ways friends influence our personalities, choices, emotions, and even physical health in this fun and compelling examination of friendship, based on the latest scientific research and ever-relatable anecdotes. Why is dinner with friends often more laughter filled and less fraught than a meal with family? Although some say it's because we choose our friends, it's also because we expect less of them than we do of relatives. While we're busy scrutinizing our romantic relationships and

family dramas, our friends are quietly but strongly influencing everything from the articles we read to our weight fluctuations, from our sex lives to our overall happiness levels. Evolutionary psychologists have long theorized that friendship has roots in our early dependence on others for survival. These days, we still cherish friends but tend to undervalue their role in our lives. However, the skills one needs to make good friends are among the very skills that lead to success in life, and scientific research has recently exploded with insights about the meaningful and enduring ways friendships influence us. With people marrying later—and often not at all—and more families having just one child, these relationships may be gaining in importance. The evidence even suggests that at times friends have a greater hand in our development and well-being than do our romantic partners and relatives. Friends see each other through the process of growing up, shape each other's interests and outlooks, and, painful though it may be, expose each other's rough edges. Childhood and adolescence, in particular, are marked by the need to create distance between oneself and one's parents while forging a unique identity within a group of peers, but friends continue to influence us, in ways big and small, straight through old age. Perpetually busy parents who turn to friends—for intellectual stimulation, emotional support, and a good dose of merriment—find a perfect outlet to relieve the pressures of raising children. In the office setting, talking to a friend for just a few minutes can temporarily boost one's memory. While we romanticize the idea of the lone genius, friendship often spurs creativity in the arts and sciences. And in recent studies, having close friends was found to reduce a person's risk of death from breast cancer and coronary disease, while having a spouse was not. Friendfluence surveys online-only pals, friend breakups, the power of social networks, envy, peer pressure, the dark side of amicable ties, and many other varieties of friendship. Told with warmth, scientific rigor, and a dash of humor, Friendfluence not only illuminates and interprets the science but draws on clinical psychology and philosophy to help readers evaluate and navigate their own important friendships.

When his father dies, and he is reduced at a stroke from prosperity to penury, Euxenus decides to leave Athens and seek his fortune elsewhere. As a philosopher and intellectual of some note, he has no difficulty getting a job as tutor to a young prince in the wealthy but utterly provincial court of King Philip of Macedon. The young prince is called Alexander, and the rest is history. Or is it? Alexander conquered Greece, Egypt and the Persian Empire in the course of eight years, amassing a huge army along the way, and leaving behind him the foundations of countless new cities named after him. He proclaimed himself a deity, and died at the age of 33. In *ALEXANDER AT THE WORLD'S END*, Tom Holt tells the story of two remarkable men, one of whom conquered empires and one of whom struggled to overcome the drainage problems of a small village. It is a story of two men whose paths crossed only briefly, but whose encounter changed both their lives for ever. And it is a story which throws an extraordinary new light on the man who became Alexander the Great.

There are all kinds of products. The good ones. The bad ones. The ones that stay in the garage moldering for years until your garden gnome makes a home out of it. Most are harmless if handled properly, even if they do contain traces of peanuts. But some are not-not the ones that contain traces of magic. Chris Popham wasn't paying enough attention when he talked to his SatNav. Sure, she gave him directions, never talked back to him, and always led him to his next spot on the map with perfect accuracy. She was the best thing in his life. So was it really his fault that he didn't start paying attention when she talked to him? In his defense, that was her job. But when "Take the next right" turned into "Excuse me," that was when the real trouble started. Because sometimes a GPS isn't a GPS-sometimes it's an imprisoned soul trapped inside a metal box that will do anything it can to get free. And some products you just can't return.

It touches all our lives-our triumphs and tragedies, our proudest achievements, our most traumatic disasters. Alloyed of love and fear, death and fire, and the inscrutable acts of the gods, insurance is indeed the force that binds the universe together. Hardly surprising, therefore, that Frank Carpenter, one of the foremost magical practitioners of our age, felt himself irresistibly drawn to it. Until, that is, he met Jane, a high-flying corporate heroine with an annoying habit of falling out of trees and getting killed. Repeatedly. It's not long before Frank and Jane find themselves face to face with the greatest enigma of our times:

When is a door not a door? When it's a mousetrap.
