Zwiebach then worked on exact analytic solutions in open string field theory. Starting in 2009, Zwiebach and Chris Hull began work on double field theory, an approach that aims to capture the T-duality properties of string theory in effective actions. Together with Olaf Hohm, Hull and Zwiebach constructed an action in terms of the generalized metric that incorporates a number of elements of generalized geometry. Zwiebach continues to work on this area, focusing now on stringy corrections to ...
