Acids and bases are essential components of the natural world that play key roles in medicine and industry. They are used in the manufacturing of everyday items such as carbonated soft drinks, salad dressing, kitchen and bathroom cleaners, and fertilizers. But these compounds can also serve a dramatic function, such as in the sulfuric acid clouds of Venus and in grave wax, a basic substance in soil that mummifies animal and human bodies. The informative *Acids and Bases* takes a closer look at these fascinating, yet contrasting, substances, giving concrete, real-world examples with numerous colorful illustrations.

An ex-Wall Street trader improved on Moneyball's famed sabermetrics and beat the Vegas odds with his own betting methods. Here is the story of how Joe Peta turned fantasy baseball into a dream come true. Joe Peta turned his back on his Wall Street trading career to pursue an ingenious—and incredibly risky—dream. He would apply his risk-analysis skills to Major League Baseball, and treat the sport like the S&P 500. In *Trading Bases*, Peta takes us on his journey from the ballpark in San Francisco to the trading floors and baseball bars of New York and the sportsbooks of Las Vegas, telling the story of how he created a baseball "hedge fund" with an astounding 41 percent return in his first year. And he explains the unique methods he developed. Along the way, Peta provides insight into the Wall Street crisis he managed to escape: the fragility of the midnineties investment model; the disgraced former CEO of Lehman Brothers, who recruited Peta; and the high-adrenaline atmosphere where million-dollar sports-betting pools were common.

The Evolutionary Bases of Consumption by Gad Saad applies Darwinian principles in understanding our consumption patterns and the products of popular culture that most appeal to individuals. The first and only scholarly work to do so, this is a captivating study of the adaptive reasons behind our behaviors, cognitions, emotions, and perceptions. This lens of analysis suggests how we come to make selections such as choosing a mate, the foods we eat, the gifts that we offer, and more. It also highlights how numerous forms of dark side consumption, including pathological gambling, compulsive buying, pornographic addiction, and eating disorders, possess a Darwinian etiology. Engaging and diverse in scope, the book maps consumption phenomena onto four key Darwinian modules: survival, reproduction, kin selection, and reciprocal altruism. As an interesting proposal, the author suggests that media and advertising contents exist in their particular forms because they are a reflection of our evolved human nature - negating the notion that they exist through the reverse causal link, as proposed by social constructivists. The link between evolutionary theory and consumption behaviors is detailed throughout the book via an examination of (among many others):

appearance-enhancing products and services; financial and physical risk-taking; use of sexual imagery and the depictions of women in advertising; and television programs, movies, songs, music videos, literature, religion, and art. *The Evolutionary Bases of Consumption* will appeal to evolutionists who desire to explore new areas wherein evolutionary theory can be applied; consumer and marketing scholars who wish to learn about the ways in which biological-and evolutionary-based theorizing can be infused into the consumer behavior/marketing/advertising disciplines; as well as other interdisciplinary scholars interested in gaining knowledge about the power of evolutionary theory in explaining a wide range of behavioral phenomena.
